CONFIDENTIAL
DRAFT FOR ADOPTION

BURSA MALAYSIA MAIN MARKET AND ACE MARKET

Crisis Communications Playbook

For public listed companies in Malaysia. Disclosure, stakeholders and the first sixty minutes.

THE FIRST SIXTY MINUTES

VERSION	1.0, draft for adoption
DATE	14 October 2026
OWNER	[Group Chief Communications Officer / Head of Corporate Affairs]
CLASSIFICATION	Confidential. Crisis Management Team, Board and named alternates
STATUS OF LEGAL CONTENT	Not verified against official Bursa Malaysia text. See “Read this first”.

EXECUTIVE SUMMARY

A listed-company crisis is two crises at once, and the order in which you disclose matters as much as what you say.

The first is an operational or reputational event, managed with speed and empathy. The second is a capital-markets event, governed by continuous-disclosure law, insider-trading law and the Exchange's expectation of equal access to information. Most failed responses at listed companies come from treating them as separate workstreams. Six messages carry the playbook.

1 **Run the first 60 minutes in order**

Verify and name it, protect people, call the Core Five, freeze, lock insiders, screen for materiality, start the clocks, tell the Board, release the first words, and set the next update time. **(p. 10)**

2 **Bursa first, everyone else second**

Material information is announced immediately through Bursa LINK, before the press release, social posts, staff note and analyst calls. The exception is narrow and ends the moment there is a leak signal. **(p. 32)**

3 **Settle who decides before the crisis**

One accountable Crisis Lead and the Core Five. Any one of the Core Five can declare at least Level 2 on their own authority, and four severity levels set who convenes and who approves. **(p. 22)**

4 **Start every regulatory clock at once**

Bursa, the PDPC, NACSA, DOSH and others run different clocks. Start every one that applies, give each a named owner, and keep the board where everyone can see it. **(p. 17)**

5 **Say five things, in the same order, everywhere**

Acknowledge, care, action, accountability, next. Same facts in every language and channel, one spokesperson per audience, and never "no comment". **(p. 42)**

6 **Prepare, rehearse, then review**

Thirteen scenario playbooks, twenty templates and three tabletop exercises turn the principles into muscle memory, and an after-action review closes the loop. **(p. 51)**

ITEM	DETAIL
Version	1.0 (draft for adoption)
Date drafted	14 October 2026
Playbook owner	[Group Chief Communications Officer / Head of Corporate Affairs]
Co-owners	[Company Secretary] · [Head of Legal] · [Head of Investor Relations]
Approved by	[Board of Directors / Audit & Risk Committee] — date: [____]
Next scheduled review	[12 months from approval, or sooner after any Level 3–4 activation or Listing Requirements amendment]
Classification	Confidential — restricted to Crisis Management Team, Board and named alternates

> **How to read the placeholders.** Anything in [square brackets] is a company-specific input you must fill in before this playbook is operational. Section 18 lists the full customisation checklist.

READ THIS FIRST — status, limits and how far to trust this document

1. This is a communications operating manual, not legal advice. Disclosure, securities, data-protection and criminal-law decisions in a crisis must be taken with Malaysian-qualified legal counsel and your Company Secretary. Where this playbook describes a legal or regulatory obligation, it is describing it for planning purposes.

2. Verification status of the regulatory content. The regulatory references in Section 5 and the scenario playbooks were checked on 14 October 2026 using web-search summaries of law-firm notes, enforcement releases, news reports and regulator-linked documents. **The Bursa Malaysia website could not be opened from the environment in which this playbook was drafted, so no paragraph number or deadline has been checked against the official rulebook text.** Every regulatory reference is therefore tagged:

TAG	MEANING
C	*Corroborated* — consistent with at least one secondary source found during drafting. Still confirm against the official text.
V	*Verify* — drawn from general knowledge or not corroborated during drafting. Treat as a prompt for your lawyers to confirm, **not** as a fact to rely on.

Appendix C lists the sources actually consulted. No source is cited in this playbook that was not actually retrieved during drafting.

3. This area changes quickly. Bursa Malaysia amends the Listing Requirements frequently (the search results surfaced, for example, a Main Market Chapter 9 document dated 31 October 2025 and ACE Market Chapter 9 Q&A dated 19 March 2026 C), and the data-protection, cyber-security and online-safety regimes were all new or amended in 2024–2026. Before the playbook is adopted, and at every annual review, have counsel re-check Section 5 against the **current** official texts.

4. No statistics are asserted. Where a numeric threshold appears (for example in severity levels), it is an *example to be calibrated by you*, and is labelled as such. Fines and penalties quoted are indicative and must be verified.

5. Languages. Bahasa Malaysia (BM) draft wording is supplied for key statements. Mandarin and Tamil versions are deliberately **not** supplied — have them prepared by native-speaker professionals. BM drafts should also be reviewed by a native speaker before use.

PART A OF F

A

Foundations

Principles, the Malaysian context and the regulatory landscape. Start here.

01 Purpose, scope and how to use this playbook 8

02 The First 60 Minutes — quick-start card 10

03 Guiding principles 13

04 The Malaysian context — what changes how a crisis plays out 14

05 Regulatory and legal landscape 17

01

Purpose, scope and how to use this playbook

Use the playbook in three layers: cards for the first hour, procedures for each function, and reference tools for the rest.

1.1

Purpose

A crisis at a public listed company (PLC) is two crises at once: an **operational or reputational event**, and a **capital-markets event**. The first is managed with speed and empathy; the second is governed by continuous-disclosure law, insider-trading law and the Exchange's expectations of equal access to information. Most failed crisis responses in listed companies come from treating these as separate workstreams. This playbook fuses them.

It gives your team:

- a **60-minute quick-start** that works when nobody has time to read (Section 2);
- **clear decision rights** — who may say what, to whom, and in what order (Sections 6, 9);
- **Malaysia-specific disclosure mechanics** — Bursa-first disclosure, trading halts, unusual market activity (UMA) queries, insider controls (Section 9);
- **13 scenario playbooks** — from ransomware to a 3R-sensitive social media storm (Section 15);
- **ready-to-edit templates**, including Bahasa Malaysia drafts (Section 16);
- **three tabletop exercises** to test the plan (Section 17);
- a **preparedness and recovery programme** (Sections 18–19).

1.2

Who it is for

AUDIENCE	USE
Crisis Management Team (CMT)	Sections 2, 6–9, 15 as live operating instructions
Board / Audit & Risk Committee	Sections 3, 6, 7, 9, 19 — oversight and escalation
Company Secretary, Legal, IR	Sections 5, 9, 16 — disclosure and regulator workflow
Corporate Communications / PR agency	Sections 10–14, 16
Subsidiary and regional heads	Sections 2, 7, 14 — know when and how to escalate

1.3

Scope and assumptions

- **Issuer type.** A company listed on Bursa Malaysia's **Main Market or ACE Market**, with subsidiaries, possibly regional operations (including Sabah and Sarawak) and a mix of institutional and retail shareholders.
- **ACE Market.** The ACE Market Listing Requirements have a parallel continuing-disclosure chapter (Chapter 9). A March 2026 ACE Market Chapter 9 Q&A document applies the same Paragraph 9.03 materiality test [C]. Paragraph numbers quoted in this playbook are **Main Market** numbers; confirm the ACE equivalent. ACE issuers that are still within their Sponsor period should include the Sponsor in their crisis contact tree [V].

- **Cross-listed or bond-funded issuers.** If you have securities on another exchange, or sukuk/bonds with a trustee, you carry parallel disclosure obligations. Align timing so that no market receives information before another. This playbook does not cover foreign exchange rules.
- **Regulated sectors.** Banks, insurers, capital-market licensees, telcos, utilities, healthcare, food and others have sector-regulator notification duties that sit *on top of* Bursa obligations (Section 5.3).
- **Not covered.** Detailed legal analysis of any particular matter; employment-law procedure; insurance claims handling; business-continuity technical recovery (this playbook links to, but does not replace, your BCP and IT disaster-recovery plans).

1.4 The three-layer structure

1. **Cards** — one-page quick references (Section 2; the clock board in 2.2; severity matrix in 7.2).
2. **Procedures** — how-to for each function (Sections 6–14).
3. **Reference and tools** — scenarios, templates, exercises, directories (Sections 15–17, Appendices).

02

The First 60 Minutes — quick-start card

The first 60 minutes are thirteen steps in a fixed order, and any one of the Core Five can raise the alarm without permission.

> **Print this page. Put it in the Crisis Lead's bag, the Company Secretary's desk drawer and the security desk.**

2.1

The sequence

WHEN	DO THIS	OWNER
0–10 min	**1. Verify and name it.** What exactly do we know? Who confirmed it? What do we *not* know? Write a two-line factual summary.	Person who received the alert
	2. Protect people first. Safety, containment, evacuation, isolate affected systems. Communications never delays a life-safety action.	Operations / HSE / CISO
	3. Call the Core Five (below) by phone, not email.	First recipient
10–20 min	**4. Freeze.** Legal hold on documents and messages. Pause scheduled posts, campaigns, emails. No external comment by anyone except the named spokesperson.	Legal / Comms
	5. Insider lock. Tell everyone who now knows: do **not** trade, do **not** tip (Template T6). Start the insider log.	Company Secretary
	6. Start the decision log. Time-stamp every decision and its reason (Template T3).	Scribe
20–40 min	**7. Materiality screen.** Run the Disclosure Decision Tree (Section 9.2). If it *might* be price-sensitive, treat it as price-sensitive until counsel says otherwise.	Disclosure Committee
	8. Market-hours check. Market open? If material and you cannot announce *now*, consider a **trading halt request** (Section 9.4).	CEO + Company Secretary
	9. Convene the CMT (war room — physical or virtual).	Crisis Lead
40–60 min	**10. Start the regulatory clocks** (2.2). Assign an owner to every clock.	Legal / Compliance
	11. Notify the Board — Chair and Audit & Risk Committee Chair, by phone.	Crisis Lead
	12. Release the first words. Holding statement + internal staff note, approved via the fast track (Section 8.1). **Bursa first** if the matter is material.	Head of Comms
	13. Set the next update time (every 60–120 minutes) and say so publicly.	Crisis Lead

2.2

The Core Five

#	ROLE	WHY THEY ARE ON THE FIRST CALL
1	**Crisis Lead** (CEO / MD or delegate)	Single accountable decision-maker
2	**Company Secretary**	Controls Bursa LINK submissions and the statutory/regulatory record
3	**Head of Legal / General Counsel**	Privilege, legal exposure, regulator posture
4	**Head of Corporate Communications**	Statements, media, social, languages

#	ROLE	WHY THEY ARE ON THE FIRST CALL
5	**CFO / Head of Investor Relations**	Market impact, lenders, ratings, shareholder communications

*Any one of the Core Five may declare a minimum **Level 2** (Section 7) on their own authority. Nobody needs permission to raise the alarm.*

2.3 The clock board — start every relevant clock at once

Fill in the "Started / Due" column on the war-room whiteboard or shared tracker. Each clock has **one named owner**. Legal basis and verification status are in Section 5.

CLOCK	TYPICAL TRIGGER	INDICATIVE DEADLINE	OWNER	STARTED / DUE
Bursa — immediate disclosure of material information	Material event or information exists	"Immediately" — no deferral to the next periodic report C	Company Secretary	
Bursa — reply to UMA / Exchange query	Query received	As stated in Bursa's query; board-endorsed reply C	Company Secretary / CEO	
Bursa — trading halt request	Material info cannot be released in an orderly way	Same day; typically requested from market open to 5 pm of the next market day in press examples C	CEO / Company Secretary	
PDPC — personal data breach (PDPA)	Notifiable personal data breach	Within **72 hours** of the breach or of being informed C	DPO / Legal	
PDPA — affected individuals	After PDPC notification	Without unnecessary delay, **no later than 7 days** after notifying PDPC C	DPO / Comms	
NACSA — cyber incident (NCII entities only)	Cyber incident at designated NCII entity	Immediate notice; fuller report within **6 hours**; supplementary within **14 days** C (confirm when each clock starts)	CISO	
BNM — technology incident (financial institutions)	Incident under RMiT	Short notification window — **confirm in current RMiT policy document**	CISO / Compliance	
DOSH (JKKP) — workplace death/serious injury	Qualifying accident	Immediately by quickest means; written report within **7 days** C *(secondary source)*	HSE head	
Lenders / trustees	Covenant or event-of-default trigger	Per facility/trust deed — **check the document**	CFO / Legal	
Insurers	Potential claim	Per policy conditions — often "as soon as practicable" V	CFO / Risk	

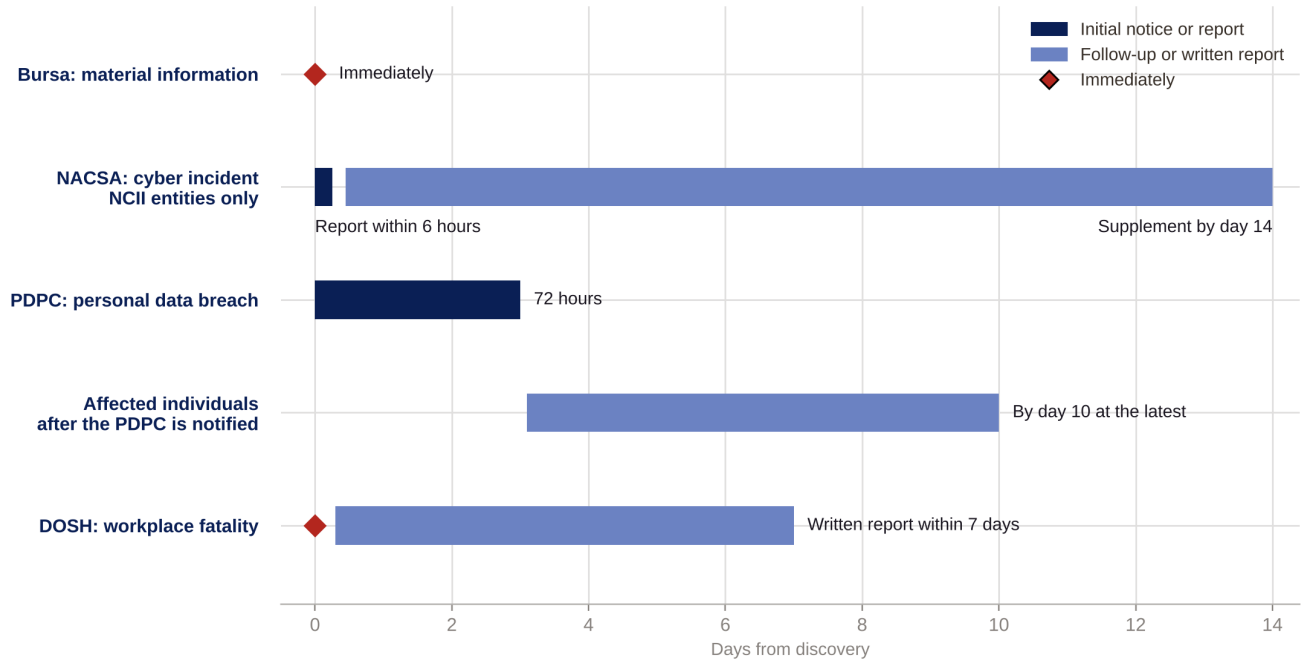

BOLD PLAY

"Pre-fill the clock board." Keep a blank clock board, pre-populated with your own contract and licence deadlines, in the war-room kit. At 3 a.m. nobody remembers the 72-hour rule; a printed sheet does.

EXHIBIT 1

Initial notices fall due within three days; follow-up duties keep running for up to two weeks

Latest compliant timing of each regulatory clock, in days from discovery. Indicative, and the PDPC is assumed notified at the 72-hour limit.

Source: Playbook Sections 2.3 and 5. Secondary sources on the PDPA, the Cyber Security Act 2024 and OSH notification; verify with counsel.

03

Guiding principles

Ten principles settle most hard calls: people first, Bursa first, facts not forecasts, one voice, and never "no comment".

These ten principles resolve most hard calls. When in doubt, re-read them.

1. **People before reputation.** Safety, welfare and dignity of affected people come first in action *and* in order of messaging.
2. **Disclosure before dissemination.** For anything that may be material, **Bursa first** — the market must receive it through the Exchange announcement system (Bursa LINK) before, or at the same moment as, any press release, social post, analyst call or shareholder briefing. No selective disclosure C *(equal-access principle)*.
3. **Presume disclosure.** Where there is doubt whether information is material, the presumption is in favour of disclosure. Bursa's Corporate Disclosure Guide is reported to say that the exceptions to immediate disclosure are narrow and that, in doubt, the presumption must always be in favour of disclosure C.
4. **Facts, not forecasts.** State only what is verified. Say what you know, what you don't yet know, what you are doing, and when you will update. Never speculate, never minimise, never promise "no impact" before you know.
5. **One voice, many channels.** One approved fact base; one authorised spokesperson per audience; identical facts across every language and channel.
6. **Own it, don't blame.** Acknowledge responsibility for what is yours to fix. Do not blame victims, contractors, regulators, journalists or "social media".
7. **Never say "no comment".** Say what you can, explain what you can't say yet and why (investigation, legal process, regulatory confidentiality), and commit to a time for the next update.
8. **No trading, no tipping.** Everyone who knows is an insider. Trading restrictions go out in the first hour (Section 9.8).
9. **Record everything.** The decision log is your evidence of good faith to Bursa, the Securities Commission, courts, auditors and insurers.
10. **Respect the sensitivities.** Race, religion and royalty (3R), faith practices, festive calendars and regional (including East Malaysian) identities are not "tone" issues; they are crisis multipliers (Section 4).

04

The Malaysian context — what changes how a crisis plays out

Local conditions change how a crisis plays out: concentrated ownership, retail investors on WhatsApp, and the weight of race, religion and royalty.

This section is practitioner judgement, not legal text. Use it to adapt global crisis-communications habits to local conditions.

4.1

Regulatory architecture in one paragraph

Bursa Malaysia Securities Berhad is the **front-line regulator** of listed issuers through the Listing Requirements, and it is the channel through which material information reaches the market. The **Securities Commission Malaysia (SC)** is the statutory regulator under the Capital Markets and Services Act 2007 (CMSA), including market-misconduct offences such as insider trading (CMSA s. 188 [C]). Sector regulators (for example Bank Negara Malaysia, the Malaysian Communications and Multimedia Commission, the Ministry of Health) and enforcement agencies (for example the Malaysian Anti-Corruption Commission and the Royal Malaysia Police) have their own powers and their own communications expectations. In a serious crisis you may deal with **four or five regulators simultaneously, each with a different clock.**

4.2

Ownership and shareholder structure

- Many PLCs have **concentrated ownership** — founders, families, or controlling shareholders — and many are **government-linked** or have large institutional anchors (for example the Employees Provident Fund, Permodalan Nasional Berhad, Khazanah Nasional, Kumpulan Wang Persaraan (Diperbadankan), Lembaga Tabung Haji — examples only; map your own register).
- **Implication:** informal information flows between the company, the controlling shareholder and big holders are common. In a crisis these flows create **insider-information and selective-disclosure risk**. Anything shared with a major holder that is material and undisclosed makes that holder an insider. Decide deliberately who is told what, and when (Section 9.9).
- **Retail participation** is significant in many small- and mid-cap counters (verify current figures with Bursa; none are asserted here). Retail investors use **WhatsApp, Telegram, Facebook groups and investor forums**. Rumours reach them faster than announcements. Prepare short, plain-language summaries in BM and Chinese for these audiences *after* the Bursa announcement.
- The **Minority Shareholders Watch Group (MSWG)** engages actively with listed companies and may raise questions publicly or at general meetings. Treat it as a stakeholder, not a threat.

4.3

Language and register

- **Bahasa Malaysia** is the national language; **English** is the language of Bursa announcements and most institutional communication; **Mandarin** and **Tamil** matter for customers, staff and community; Iban, Kadazan-Dusun and other languages matter in East Malaysia; your **migrant workforce** may speak Bahasa Indonesia, Bengali, Nepali, Burmese and others.

- **Rule:** the first public statement should be available in **English and BM** at the same time. Do not publish English first and "follow with BM later" if the issue touches the public — the delay itself becomes the story. Prepare Mandarin and Tamil within hours for consumer-facing crises.
- Use the correct **honorifics and styles** (Tan Sri, Dato' Sri, Datuk Seri, Dato', Datuk, Dr, Puan Sri, etc.) in every statement and in how spokespersons are introduced. Errors read as disrespect.

4.4 The 3R and community sensitivities

- **Race, Religion, Royalty (3R)** are legally and socially sensitive in Malaysia. Content that touches any of them can escalate from a corporate embarrassment to a police-report-and-political-statement event within hours. Whether any specific statement breaches a law (for example under the Sedition Act 1948 or the Communications and Multimedia Act 1998, s.233 V) is for counsel — but *comms must treat any 3R-adjacent incident as automatically Level 3 until reviewed* (Section 7).
- For food, beverage, cosmetics and pharmaceutical issuers, **halal integrity** is a trust issue as well as a compliance one.
- **Apologies** for 3R-related lapses should be prompt, sincere, specific about what was wrong and what has been done, and free of "if anyone was offended" phrasing (Scenario S12, Template T13).

4.5 East Malaysia and regional press

Sabah and Sarawak have their own media ecosystems, political dynamics and identities. A statement drafted in Kuala Lumpur and distributed only to Klang Valley media can look dismissive or invisible in East Malaysia. Maintain East Malaysian media contacts and, where operations are there, a regional spokesperson. Check whether your crisis affects Sabah and Sarawak differently (for example MA63-related sensitivities, local employment, indigenous community relations).

4.6 The calendar

- **Ramadan, Hari Raya Aidilfitri, Chinese New Year, Deepavali, Hari Gawai, Kaamatan, Christmas, Malaysia Day, school holidays** and long weekends change staff availability, media pickup, tone and public mood. A cheerful marketing post during a crisis, or an incident at a *balik kampung* peak, magnifies backlash.
- State-level holidays and, in some states, different weekends affect when officials and counterparties are reachable. Keep the Bursa market-holiday calendar and a state-by-state calendar in the war-room kit.
- Build **dual-calendar awareness** (Gregorian and Hijri, plus major festive dates) into campaign pauses and statement timing.

4.7 Channels and rumour dynamics

- **WhatsApp is the primary channel** for rumour spread: forwarded messages, screenshots of "internal memos", voice notes, and fake "announcements". Assume every internal message may be leaked as a screenshot.
- **TikTok, Facebook, Instagram, X, YouTube, Telegram, Threads and — for Chinese-speaking audiences — platforms such as Xiaohongshu** may each carry a different version of the story.
- Deepfakes, impersonated company accounts and fake announcements are credible risks (Scenario S13).

4.8

Politics and public institutions

Ministers, Members of Parliament, state governments and agencies may comment on a corporate crisis before the company has finished its disclosure. For GLCs and heavily regulated sectors, political attention can be immediate. Maintain a **Government and Regulatory Relations** lead who coordinates with the CEO, and make sure no ministerial or regulator conversation yields market-sensitive information to one party that hasn't been announced to the market.

05

Regulatory and legal landscape

Bursa's disclosure duty sits on top of data, cyber, workplace and sector rules, and each one carries its own clock.

> **Reminder:** [C] = corroborated by a secondary source during drafting; [V] = verify with counsel. **None of the paragraph numbers have been checked against official text.** Treat this section as a checklist of *questions for counsel*.

5.1 Continuous disclosure and market conduct

#	OBLIGATION	SOURCE	WHAT IT MEANS IN A CRISIS	TAG
1	**Immediate public disclosure of material information**	Main LR Para 9.03(1); ACE Market LR Chapter 9	When material information exists, announce it immediately via Bursa LINK, unless a narrow exception applies. Do not wait for the next periodic report.	[C]
2	**Materiality test**	Main LR Para 9.03 / Chapter 1 definition	Information is material if it is reasonably expected to have a material effect on the price, value or market activity of the issuer's securities. The definition also refers to an investor's decision on what action to take.	[C] for price/value/market-activity limb; [V] for investor-decision limb wording
3	**Exception to immediate disclosure (confidentiality)**	Main LR Para 9.05	Narrow. Withholding is expected to end as soon as there is a leak, rumour, report, or unusual market activity suggesting the information is out. Bursa enforcement releases state that the right to withhold ceases where UMA signifies a possible leak. Secondary summaries of Bursa's guidance also say that Para 9.05 permits temporary non-disclosure only in exceptional circumstances with complete confidentiality, and that issuers should not accept confidentiality undertakings that defeat the immediate-disclosure duty (Para 9.06) **[C, secondary]**.	[C] on the principle; [V] on the exact conditions
4	**Response to Bursa queries / unusual market activity (UMA)**	Main LR Para 9.16	Bursa enforcement releases on Lay Hong Berhad and Tecnic Group Berhad (both 2017) describe public reprimands and fines on directors for breaches of Para 9.16(1)(a) in UMA responses. UMA replies are issued as board-endorsed announcements. A more recent UMA query reported in August 2026 (Zetrix AI, Business Today) cites **Para 9.11** and asks the issuer to make immediate enquiries of its board, major shareholders and relevant personnel, so the paragraph number may differ from the 2017 releases: confirm the current number. Bursa has said that an inaccurate or misleading reply can lead to enforcement against the issuer and culpable directors, and that a UMA query does not by itself mean a suspension [C].	[C] on the process; [V] on the current paragraph number
5	**Quarterly and annual reporting**	Main LR Paras 9.22(1), 9.23(1)	Quarterly reports within two months of quarter-end; annual report within four months of financial year-end. A crisis does not suspend these. Late-reporting breaches are enforced.	[C]
6	**Trading suspension / halt on issuer request**	Main LR Practice Note 2 (Requests for Suspension), e.g. paras 3.1(a), 3.1(b)	Issuers ask Bursa for a halt pending a material announcement. Press examples show halts from market open to 5 pm on the next market day (for example Tong Herr, 6 August 2026, and Axiata, December 2024); Bursa decides, and the cited sub-paragraphs of paragraph 3.1 vary between examples. Broker pages show the afternoon session closing at 5:00 pm, with pre-close from 4:45 pm to 4:50 pm: material news that arrives during trading hours needs an immediate announcement or a halt request [C].	[C]

#	OBLIGATION	SOURCE	WHAT IT MEANS IN A CRISIS	TAG
7	**Directors' dealings and closed periods**	Main LR Chapter 14 (e.g. Para 14.08 notification)	Directors face restrictions on dealing before results announcements and notification duties after dealing. **Confirm the current closed-period length and scope.**	V
8	**Insider trading and tipping**	CMSA s.188	Dealing, or communicating inside information, is a criminal offence. SC enforcement releases cite imprisonment of up to 10 years and a fine of not less than RM1 million; the SC can also pursue civil proceedings (s.201(6)).	C — verify penalty figures
9	**Financial-condition regime**	Practice Note 17 (Main Market); Guidance Note 3 (ACE)	PN17 classification arises where, among other criteria, shareholders' equity falls to 25% or less of share capital and below RM40 million (reported in a July 2026 PN17 classification). A PN17 issuer must regularise.	C for the equity trigger as applied; V for the RM40m figure in current text and for GN3
10	**Corporate disclosure policy / governance expectations**	Main LR Chapter 9; Malaysian Code on Corporate Governance 2021	Issuers are expected to have a corporate disclosure policy and clear spokesperson authority.	V
10a	**No selective disclosure**	Main LR Para 9.08(2); limited exceptions in 9.08(3)	Material information must not go to analysts, shareholders, journalists or others before it has been fully disclosed to the public. Bursa's Q&A, as summarised in secondary sources, allows narrow exceptions (for example disclosure to advisers in due diligence under strict confidentiality, with market activity closely monitored). Ask the Company Secretary before relying on any exception.	**[C, secondary]** — verify against the current text
10b	**Winding-up petitions**	Main LR Para 9.19(19)(a)(i)	Bursa's September 2026 reprimand of Ahmad Zaki Resources cites this paragraph for failing to announce winding-up petitions immediately (delays of roughly 10 to 50 days), and states that ongoing settlement talks with the petitioner do not excuse non-disclosure. Treat any petition, notice or order as a disclosure trigger.	**[C, secondary]** — verify against the current text
11	**Takeover rules**	SC Rules on Take-overs, Mergers and Compulsory Acquisitions	Rumours or leaks about offers trigger special announcement/conduct duties. Take specialist advice immediately.	V
12	**Bursa's Corporate Disclosure Guide**	Bursa Malaysia (2011 edition circulated; check for later versions)	Practical guidance on disclosure, analyst/media interaction, rumours and market-sensitive information.	C existence; V current version

⚠ **Why enforcement matters to comms.** The enforcement pattern is consistent: Bursa focuses less on the bad news itself than on **delayed disclosure, inaccurate or incomplete disclosure and evasive replies to Exchange queries**, and it fines individual directors. In a crisis, the way you communicate is itself a compliance event.

5.2 Data, cyber and online-safety law

#	OBLIGATION	SOURCE	CRISIS IMPLICATION	TAG
13	**Personal data breach notification**	Personal Data Protection Act 2010 as amended in 2024; PDPC data breach notification guideline (2025)	Notify the Commissioner as soon as practicable and no later than 72 hours from the breach occurring or being informed. Reported thresholds: significant harm or more than 1,000 individuals. If late, a written explanation with evidence is required. Notify affected individuals without unnecessary delay and no later than 7 days after notifying the Commissioner. Each controller notifies separately. Law-firm summaries differ on whether the 72-hour window comes from the amended Act or from the Commissioner's guideline; the guideline sets it out in any case.	C — verify against the guideline and form on the PDPC website
14	**Cyber security incident notification (NCII entities)**	Cyber Security Act 2024 (Act 854) and Cyber Security (Notification of Cyber Security Incident) Regulations 2024	Applies to designated National Critical Information Infrastructure (NCII) entities: immediate electronic notice to NACSA and the sector lead; incident details within 6 hours; supplementary details within 14 days. Confirm when each clock runs from. In force since 26 August 2024.	C
15	**Technology risk and incident notification (financial sector)**	Bank Negara Malaysia — Risk Management in Technology (RMiT) policy document	Financial institutions have specific incident reporting duties and downtime expectations. A one-hour notification figure circulates informally but was **not confirmed** in drafting.	V
16	**Online Safety Act 2025 (Act 866)**	In force 1 January 2026	Applies to licensed platform and application service providers (not individuals). Platforms must run safety measures and user-reporting tools; some response windows are very short. Use platform reporting channels for *genuinely* harmful content (fraud, impersonation, harassment). **Do not** use them to suppress legitimate criticism — it will backfire.	C — verify penalty and window details
17	**Content and defamation law**	Communications and Multimedia Act 1998 (e.g. s.233); Defamation Act 1957; Sedition Act 1948	Counsel-led. Do not send legal threats as a reflex. A public threat against a journalist or critic usually enlarges the story.	V

5.3 Workplace, environment, product, anti-corruption and sector law

#	OBLIGATION	SOURCE	CRISIS IMPLICATION	TAG
18	**Workplace accident notification**	Occupational Safety and Health Act 1994; NADOPOD Regulations 2004 (Notification of Accident, Dangerous Occurrence, Occupational Poisoning and Occupational Disease)	Employers must notify the nearest DOSH (JKKP) office of qualifying accidents, dangerous occurrences, poisoning and disease; forms JKKP 6, 7, 8 exist. For death or serious injury, a secondary source reports immediate notification by the quickest means, followed by a written report within 7 days.	C *(secondary)*
19	**Employment injury and social security**	Employees' Social Security Act 1969 (PERKESO/ SOCSO)	Workplace injury claims and employer reporting.	V
20	**Environmental incidents**	Environmental Quality Act 1974 and licence conditions (DOE)	Notify DOE according to licence conditions; spills and emissions can become instant national stories.	V

#	OBLIGATION	SOURCE	CRISIS IMPLICATION	TAG
2.1	**Corporate liability for corruption**	MACC Act 2009, s.17A (in force since 1 June 2020)	A commercial organisation can be liable for corruption by an associated person for its benefit. The defence is having "adequate procedures"; Government guidelines frame these as the **TRUST** principles (Top-level commitment, Risk assessment, Undertake control measures, Systematic review/monitoring/enforcement, Training and communication). Directors and managers may face deemed liability unless they can prove no consent/connivance and due diligence.	C on s.17A, TRUST, effective date; V on deemed-liability detail
2.2	**Whistleblower protection**	Whistleblower Protection Act 2010	Never retaliate against, expose or try to identify a whistleblower.	V
2.3	**Product safety, food, pharma, devices, halal**	Ministry of Health (food safety, NPRA), Medical Device Authority, KPDN, JAKIM/state halal authorities, etc.	Recalls and corrective action have their own notification routes and timetables.	V
2.4	**Directors' duties**	Companies Act 2016 (e.g. s.213)	Directors' duties of care, skill, diligence and good faith inform board involvement in crisis oversight.	V
2.5	**Sector regulators**	BNM (banks, insurers, payments); SC (capital-market licensees); MCMC (telecoms/content); Energy Commission; others	Identify your sector regulator(s) and fill in Appendix A.	V

5.4 Regulator notification matrix — fill in once, keep current

REGULATOR / AUTHORITY	OUR RELATIONSHIP MANAGER	24/7 CONTACT	OUR TRIGGER	CLOCK	OWNER	LAST TESTED
Bursa Malaysia (Listing/ Regulation)	[name]	[number]	Material information; UMA; halt	Immediately	Company Secretary	[date]
Securities Commission Malaysia	[name]	[number]	Licensee notifications; market misconduct; takeover	[per rule]	Legal	
PDPC (Personal Data Protection Commissioner)	[name]	[portal/ email]	Notifiable data breach	72 hours	DPO	
NACSA / sector lead (if NCII)	[name]	[portal]	Cyber incident	Immediate / 6 h / 14 d	CISO	
Bank Negara Malaysia (if applicable)	[name]	[number]	Technology / operational incident	[per policy]	CISO / Compliance	
DOSH (JKKP)	[office]	[number]	Qualifying accident	Immediately / 7 days	HSE	
DOE	[office]	[number]	Pollution incident	[per licence]	HSE	
MACC / PDRM (as relevant)	[Legal lead]		Investigations, reports	n/a	Legal	
Sector regulator(s)

06 Crisis governance: roles, decision rights and activation 22

07 Crisis classification and escalation 26

08 Response timeline and checklists 29

06

Crisis governance: roles, decision rights and activation

One accountable Crisis Lead, a Board kept informed, and decision rights agreed before the crisis start.

6.1

Structure

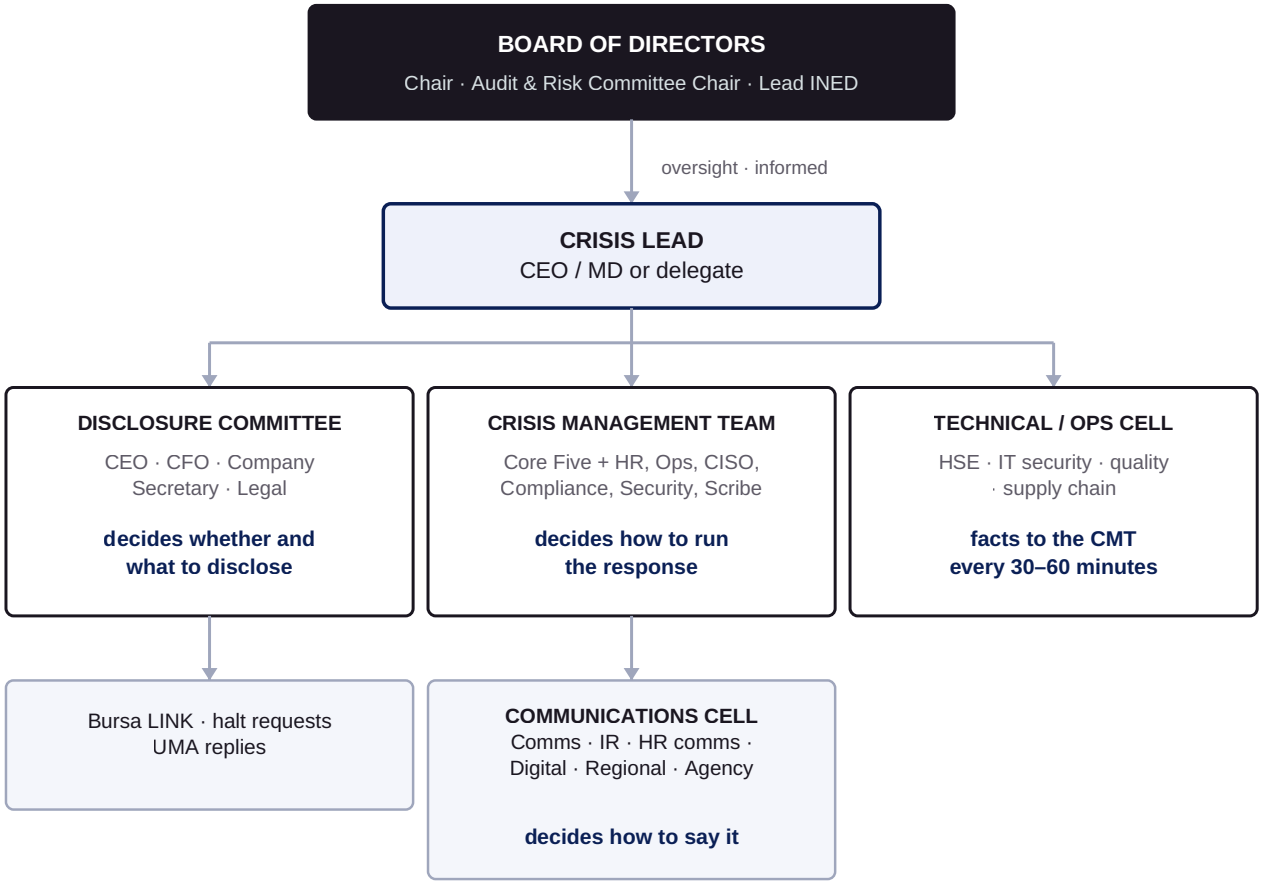

FIGURE · CRISIS GOVERNANCE STRUCTURE (SECTION 6.1)

*The Disclosure Committee decides **whether and what** to disclose to the market. The CMT decides **how to run the response**. The Communications Cell decides **how to say it**. Do not let one body quietly do another's job.*

6.2

Roles and responsibilities

ROLE	CRISIS RESPONSIBILITIES	ALTERNATE
Crisis Lead (CEO/MD; COO for pure operational events; the Chair or Lead INED where the CEO is conflicted or implicated)	Declares level; chairs CMT; final operational decisions; primary spokesperson for Level 3–4	[Name]
Board Chair / Lead Independent Director	Oversight; approves extraordinary actions; speaks publicly only in governance crises or when the CEO is conflicted; ensures independent investigation where needed	[Name]

ROLE	CRISIS RESPONSIBILITIES	ALTERNATE
Audit & Risk Committee Chair	Oversees financial-reporting, internal-control and investigation matters; liaison with external auditors	[Name]
Company Secretary	Gatekeeper of Bursa LINK submissions; maintains insider log; convenes board resolutions; keeps statutory and regulatory record; interprets the Listing Requirements with counsel	[Name]
Head of Legal / General Counsel	Legal analysis; privilege; litigation hold; regulator engagement; reviews every external statement	[Name]
CFO	Quantifies financial impact; lender, auditor and rating-agency engagement; liquidity; confirms numbers in any announcement	[Name]
Head of Investor Relations	Analyst, fund-manager and shareholder communications **after** Bursa announcement; monitors share price and trading; maintains Q&A	[Name]
Head of Corporate Communications	Owns communications strategy, holding statements, media, social, spokesperson preparation, translations; chairs the Communications Cell	[Name]
Head of HR	Staff welfare and family liaison; internal comms; union/employee-relations; workforce-language coverage	[Name]
COO / Business Unit Head	Containment; operations; customers; supply chain	[Name]
CISO / CIO	Cyber/IT facts, containment, forensic liaison; out-of-band communications	[Name]
Head of Compliance / Risk	Regulator liaison; conflicts of interest; whistleblowing channel integrity	[Name]
Head of HSE / Security	Safety, evacuation, authority liaison (DOSH, BOMBA, PDRM)	[Name]
Scribe / Decision-log keeper	Records every decision, time, owner and reason — nothing else	[Name]
Regional / language spokespersons	BM, Mandarin, Tamil, East Malaysia; trained and pre-cleared	[Names]
External advisers	Malaysian law firm; forensic accountant; cyber incident-response firm; PR/crisis agency; IR adviser; principal adviser/Sponsor; translators	See contact sheet

6.3 Decision rights

DECISION	DECIDES	MUST CONSULT	MUST INFORM
Declare / change crisis level	Crisis Lead (any Core Five member can trigger minimum Level 2)	Core Five	CMT, Board (L3+)
Is the information **material**? Announce to Bursa?	**Disclosure Committee** (CEO, CFO, CoSec, Legal); board approval route per your disclosure policy	External counsel; principal adviser if a corporate exercise; Chair/ARC Chair	Board
Request a trading halt	CEO with Company Secretary	Legal; Chair; Bursa (by phone before filing, where practicable)	Board, IR

DECISION	DECIDES	MUST CONSULT	MUST INFORM
Reply to a **UMA / Exchange query**	Board (endorsement) after due enquiry led by Company Secretary and Legal C	Management, subsidiaries, major shareholders as appropriate	Board, IR
Release a **pre-approved holding statement**	Head of Comms (fast track)	Legal (30-minute window)	Crisis Lead
Release a **new or bespoke statement**	Crisis Lead on advice of Legal + Comms	CoSec if market-sensitive	CMT
Press conference / CEO interview	Crisis Lead	Comms, Legal	Board Chair
Regulator and authority notifications	Owner of each clock (Section 2.3) with CEO sign-off	Legal	CMT
Suspension/leave of a director or key management personnel	Board (or committee)	HR, Legal, CoSec	Disclosure Committee
Engage external advisers / spend above delegated authority	Crisis Lead (emergency authority up to RM [____])	CFO	Board
Pay a ransom / negotiate with extortionists	**Board**, after legal advice and law-enforcement consultation	Legal, insurers, CISO, forensic firm	Disclosure Committee

> ⚠ **Two-key rule for market-sensitive text.** Any text that may reach the market — Bursa announcement, press release, investor talking points — needs sign-off from **(a) Legal or Company Secretary** *and* **(b) CEO or CFO**. Holding statements that the Board has pre-approved are the only exception.

6.4 Conflicts and the "compromised leader" protocol

Pre-agree what happens if the crisis implicates the CEO, a director, the CFO, the Company Secretary or the Head of Legal:

- That person is **recused** from decisions about the matter (but may be interviewed) and the **alternate** acts.
- The **Lead Independent Director** or **ARC Chair** assumes oversight; an independent investigation (external counsel and, where relevant, forensic accountants) reports to them, not to management.
- Communications about the person use **presumption-of-innocence language** while remaining honest about measures taken (leave, suspension, restricted access).
- Document recusals in the decision log.

6.5 Activation protocol

1. **Trigger.** Anyone aware of a potential crisis calls the **Crisis Hotline** [number] or the Head of Comms / Company Secretary directly. *Do not rely on email or a group chat.*
2. **Core Five call** within 15 minutes; they agree an initial level (Section 7).
3. **CMT convened** — Level 3–4 within 60 minutes; Level 2 as needed.

4. **War room opened** (6.6). Scribe starts the log. First situation report (SITREP, Template T2) within 90 minutes.
5. **Cadence set:** CMT huddles every 60 minutes initially, then 2–4 hours, then twice daily. Written SITREPs at least every 4 hours at Level 3–4.
6. **Shift plan** for crises beyond 12 hours — assign relief for every role; no one runs a crisis for 30 hours without sleep.

6.6 War room

- **Physical room** [location, with backup in a different building], with screens, whiteboard for the clock board, power backup, printed playbook, contact sheets, and the war-room kit (Section 18.3).
- **Virtual room** — a dedicated, access-controlled channel for the CMT with **message retention switched on** (do not use ephemeral/disappearing messages for decisions). Keep the membership list tight; a former employee in the group is a leak.
- **Out-of-band channel** — if the incident is cyber, assume email, chat and VoIP may be compromised. Agree in advance an alternative (personal-device tree, phone bridge, printed phone list) and test it twice a year.
- **Rule of the room:** facts stay in the war room; opinions go to the decision log; nothing goes to social media or personal chats.

6.7 Spokespersons

AUDIENCE	PRIMARY	BACK-UP	NOTES
Media — national, English/ BM	[CEO / Head of Comms]	[Group exec]	Media-trained within last 12 months
Media — technical (safety, product, IT)	[Head of HSE / CISO / Head of Quality]		Never speculates on cause
Media — Mandarin / Tamil	[Named spokespersons]		Fluent, pre-cleared, same facts
Media — East Malaysia	[Regional head]		Present in person where operations are
Analysts / investors	[CFO / Head of IR]	CEO	Only after Bursa announcement; only public information
Employees	[CEO + HR head]		Town hall; managers cascade
Regulators	[Legal / Compliance / CoSec]		Not the PR team
Board / governance crisis	[Chair]	Lead INED	

07

Crisis classification and escalation

Four severity levels decide who is in the room and how fast approvals move: upgrade quickly, downgrade slowly.

7.1

Why levels exist

Levels set **who is in the room, how fast approvals move and how much of the Board is involved**. A level is a working assumption, reviewed every hour; upgrade quickly, downgrade slowly.

7.2

Severity matrix

> **The numeric thresholds below are examples. Calibrate them to your company's size, risk appetite and materiality judgement, and have the Board approve them.**

	LEVEL 1 — ISSUE	LEVEL 2 — INCIDENT	LEVEL 3 — CRISIS	LEVEL 4 — CRITICAL
Description	Contained, local, low visibility	Notable, still manageable by a business unit with HQ support	Significant; threatens brand, licence, or share price; likely national attention	Existential or systemic; threat to the company's continuity, licence, solvency or leadership
People	Minor first-aid	Injury requiring treatment; employee-conduct complaint	Fatality or multiple serious injuries; large-scale customer harm	Multiple fatalities; widespread public harm
Financial (examples — calibrate)	< [x]% of group revenue/profit	[x–y]%	> [y]% or covenants at risk	Solvency/going-concern in question; PN17 risk
Market	No market effect	Unusual chatter; minor price move	UMA query likely/received; sharp price move; halt considered	Halt required; takeover/default/delisting risk
Regulatory / legal	Routine notification	Formal regulator enquiry	Regulator investigation; licence conditions at risk; criminal-law exposure	Raids/arrests; licence revocation; winding-up petition
Media / social	Single outlet, low reach	Several outlets; trending locally	National media; viral; political comment	Sustained national and international coverage; boycott
Data / cyber	Contained, no personal data	Limited personal data	Notifiable breach; major outage	Systemic outage; extortion; critical-infrastructure impact
3R / community sensitivity	None	—	**Any 3R-adjacent content = at least Level 3 until reviewed**	Public order concerns
Who convenes	Head of function	Core Five (virtual)	Full CMT; Board Chair told	Full CMT; Board convened; external advisers on site
Statement approval	Function head + Comms	Comms + Legal	Crisis Lead + Legal + CoSec	Crisis Lead + Chair/Board

EXHIBIT 2

The severity level decides who is in the room and who approves the words

The four levels, from a contained issue to a critical event.

LEVEL 1	LEVEL 2	LEVEL 3	LEVEL 4
Issue	**Incident**	**Crisis**	**Critical**
Contained, local, low visibility	Notable; a business unit can manage it with HQ support	Significant; threatens brand, licence or share price	Existential or systemic; threat to continuity, licence, solvency or leadership
WHO CONVENES **Head of function**	WHO CONVENES **Core Five (virtual)**	WHO CONVENES **Full CMT; Board Chair told**	WHO CONVENES **Full CMT Board convened external advisers on site**
WHO APPROVES THE STATEMENT **Function head + Comms**	WHO APPROVES THE STATEMENT **Comms + Legal**	WHO APPROVES THE STATEMENT **Crisis Lead + Legal + CoSec**	WHO APPROVES THE STATEMENT **Crisis Lead + Chair / Board**

Source: Playbook Section 7.2. Thresholds in that section are examples to calibrate and have the Board approve.

7.3 Escalation triggers — "if any is true, escalate"

- A journalist, regulator, law-enforcement agency or politician has asked about it.
- An employee, customer or contractor has been killed or seriously harmed.
- Personal data of customers or staff may have left your control.
- The share price or trading volume is moving without explanation, or Bursa has contacted you.
- Allegations of corruption, fraud, accounting irregularity or misconduct involving directors or senior management.
- A major customer, lender, regulator or licensing body has expressed concern.
- The matter is on WhatsApp in a form you did not create.
- Anything touches race, religion or royalty.
- You are not sure.

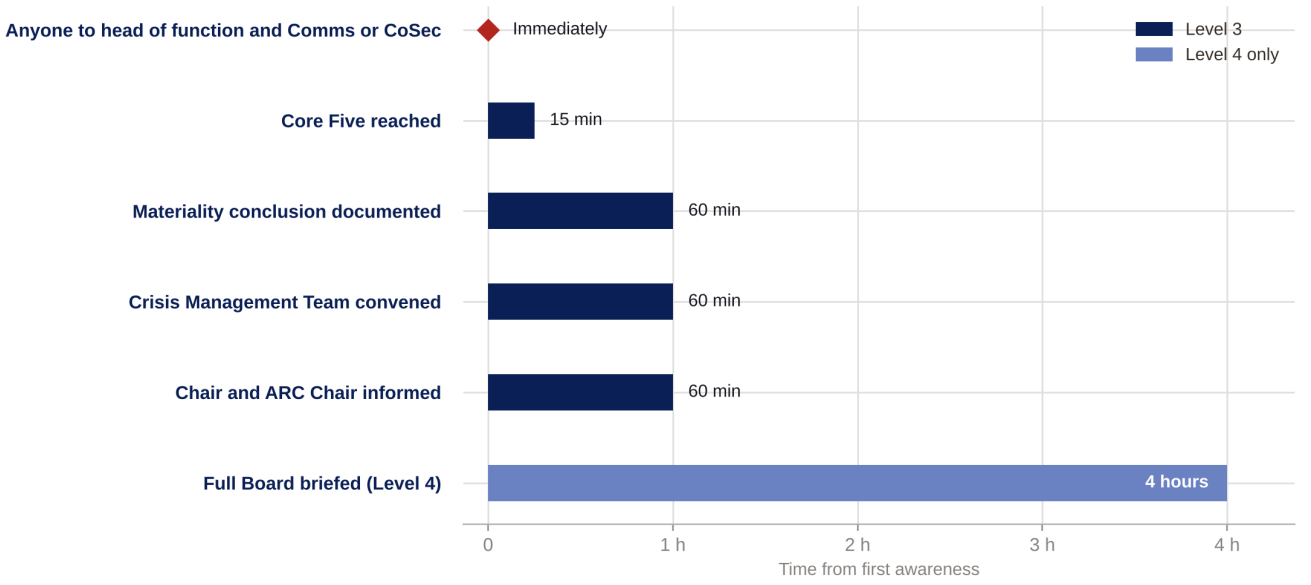

7.4 Default escalation clocks (calibrate)

FROM	TO	BY
Anyone	Head of function **and** Head of Comms / CoSec	Immediately
Head of Comms / CoSec	Core Five	15 minutes from awareness
Core Five	CMT convened	60 minutes (L3–4)
Crisis Lead	Board Chair + ARC Chair	60 minutes (L3), immediately (L4)
Disclosure Committee	Materiality conclusion documented	Within 60 minutes of first credible indication
Board	Full board briefed	Within 4 hours (L4), before next market open where practicable

EXHIBIT 3

Three decisions are due inside the first hour, and the full Board within four

Default escalation clocks for a Level 3 crisis, in minutes from first awareness.

Source: Playbook Sections 7.2 to 7.4. Defaults to calibrate to your company.

08 Response timeline and checklists

A 30-minute fast track gets the first words out; phase checklists carry the rest of the response.

8.1 The fast track for first words

To avoid the delay that turns a bad day into a bad week, pre-agree a **30-minute fast track** for holding statements:

1. Comms drafts from the pre-approved holding statement (Template T7–T12).
2. Legal and Company Secretary review (10 minutes).
3. If market-sensitive: Disclosure Committee decides on Bursa announcement first.
4. Release in **English and BM** together.
5. Log the release time and wording.

8.2 Phase checklists

Phase 1 — Stabilise (0–1 hour)

- ☐ Safety/containment actions under way
- ☐ Two-line verified fact summary written
- ☐ Core Five reached; Crisis Lead named
- ☐ Legal hold issued; scheduled content paused
- ☐ Insider log started; do-not-trade notice sent (T6)
- ☐ Decision log started (T3)
- ☐ Initial materiality screen done (Section 9.2)
- ☐ Regulatory clocks identified and owners assigned (Section 2.3)
- ☐ Spokesperson identified; staff told "refer all queries to Comms"

Phase 2 — Assess and announce (1–4 hours)

- ☐ CMT convened; war room operational
- ☐ Facts verified by two sources before use externally
- ☐ Bursa announcement and/or halt decision made and logged
- ☐ Holding statement released (EN + BM); staff note released
- ☐ Board Chair/ARC Chair informed; broader Board briefed as required
- ☐ Media-query log open; first responses sent (acknowledge, give time of next update)
- ☐ Social and media monitoring live with a named escalation owner
- ☐ Key customers, lenders and partners given a short heads-up **after** the Bursa announcement if the matter is material
- ☐ Insurers notified; external advisers engaged

Phase 3 — Sustain (4–24 hours)

- ☐ SITREP issued; next update time published

- [ ] Facts refreshed; Q&A updated (Section 11)
- [ ] Regulators briefed as required; filings made
- [ ] Employee briefing/town hall held; managers equipped with talking points
- [ ] Analyst/investor communications prepared for release **after** Bursa announcement
- [ ] Rumour log reviewed; corrections issued only through official channels
- [ ] Shift roster in place; fatigue managed
- [ ] Share-price and trading-volume watch with CFO/IR

Phase 4 — Consolidate (24–72 hours)

- [ ] Root-cause work commissioned with clear independence where needed
- [ ] Follow-up Bursa announcements made as facts develop (an "update" announcement every time the material picture changes)
- [ ] Support for affected people (victims, customers, staff, families) visible and measurable
- [ ] Stakeholder map reviewed; any missed group contacted
- [ ] Board decision on any extraordinary measures (leaves, independent review, leadership change)
- [ ] Press conference or interview scheduled if warranted (Section 12.5)

Phase 5 — Stabilise and investigate (Days 4–14)

- [ ] Independent findings schedule communicated
- [ ] Regulatory submissions and follow-ups tracked
- [ ] Customer/supplier remediation under way
- [ ] Employee pulse check and counselling support
- [ ] Reputation metrics tracked (Section 19.3)

Phase 6 — Recover (Weeks 2–12)

- [ ] 30-60-90 rebuild plan approved (Section 19.2)
- [ ] Say-do ledger published internally and, where appropriate, externally
- [ ] Corporate governance and risk-management disclosures updated in the annual report
- [ ] Insurance recoveries and legal exposures tracked

Phase 7 — Learn (within 30 days of de-escalation)

- [ ] After-action review completed (Template T17)
- [ ] Playbook updated; owners and dates assigned
- [ ] Board receives the review

8.3 Fatigue and well-being

Crisis teams make worse decisions after 18+ hours. Rotate decision-makers, schedule meals and rest, and provide counselling access to team members who have faced traumatic events (fatalities, threats, online harassment). Include the families of crisis-team members in your thinking: staff may be doxxed or harassed.

PART C OF F

C

Communicate

Disclosure to Bursa first, then stakeholders, messaging, media, digital and staff.

09 Disclosure and capital-markets playbook (Bursa-first) 32

10 Stakeholder map 40

11 Messaging framework and Q&A 42

12 Media playbook 45

13 Digital and social media 47

14 Internal communications 49

09

Disclosure and capital-markets playbook (Bursa-first)

For a material event, Bursa hears first, and the exception to immediate disclosure is narrow and short-lived.

This is the section that distinguishes a PLC playbook from a generic one. It covers what you must tell the market, how and when, and how you keep information under control until you do.

9.1

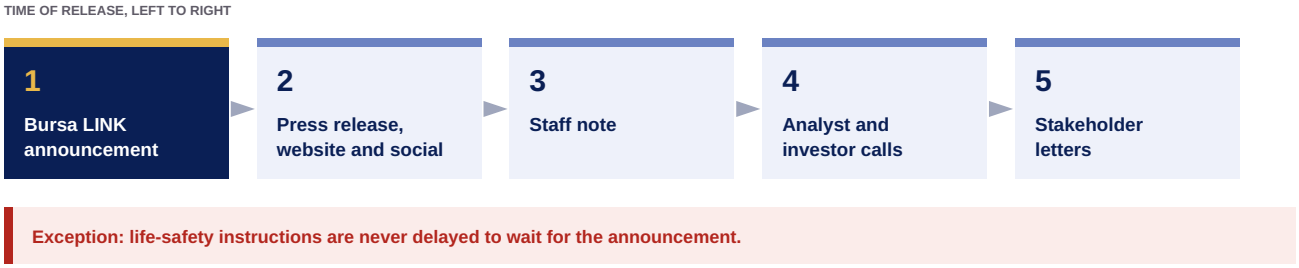

Core rules in plain language

1. **If it is material, announce it immediately through Bursa.** Not "after the press conference", not "after the board meeting next week", not "when we know more". The obligation is "immediate" disclosure [C]; in practice that means as soon as the facts allow an accurate announcement, and an interim announcement of what you know is better than silence. *(That practical reading is the drafter's, not a quotation — confirm how the Listing Requirements define "immediately" [V].)*
2. **Bursa first, everyone else second.** Media, analysts, lenders, customers, employees and social media hear it at the same time as or after the market. The practical sequence for a material event is: *Bursa LINK announcement → press release / website / social → staff note → analyst and investor calls → stakeholder letters.* The exception is life-safety instruction, which is never delayed.
3. **The exception to immediate disclosure is narrow and short-lived.** Companies have been able to withhold material information that is in a state of flux, but Bursa enforcement releases state that this right ceases when unusual market activity suggests a leak [C]. Treat any leak signal — UMA, rumour, press query, social chatter, unusual volume — as the end of the confidentiality window.
4. **Do not use "negotiations in progress" as a shield.** Bursa has stated that unpublished material information, including matters at the negotiation or discussion stage, must be disclosed when the exception ends [C] *(Lay Hong 2017 release)*.
5. **Accuracy beats speed — but speed has a ceiling.** A short, accurate holding announcement ("the company is aware of X; investigation under way; further announcement to follow") is better than a perfect one delivered after rumours have moved the stock.
6. **Say the same thing everywhere.** Bursa announcement, press release, website, social posts and scripts must be word-consistent on facts, numbers and dates.
7. **Update when the picture changes.** Each material development triggers a new announcement; do not let the market's understanding drift from the facts.

EXHIBIT 4

For a material event the market hears first and everyone else follows

The order of release. Life-safety instructions are never delayed.

Exception: life-safety instructions are never delayed to wait for the announcement.

Source: Playbook Section 9.1.

9.2 Disclosure Decision Tree

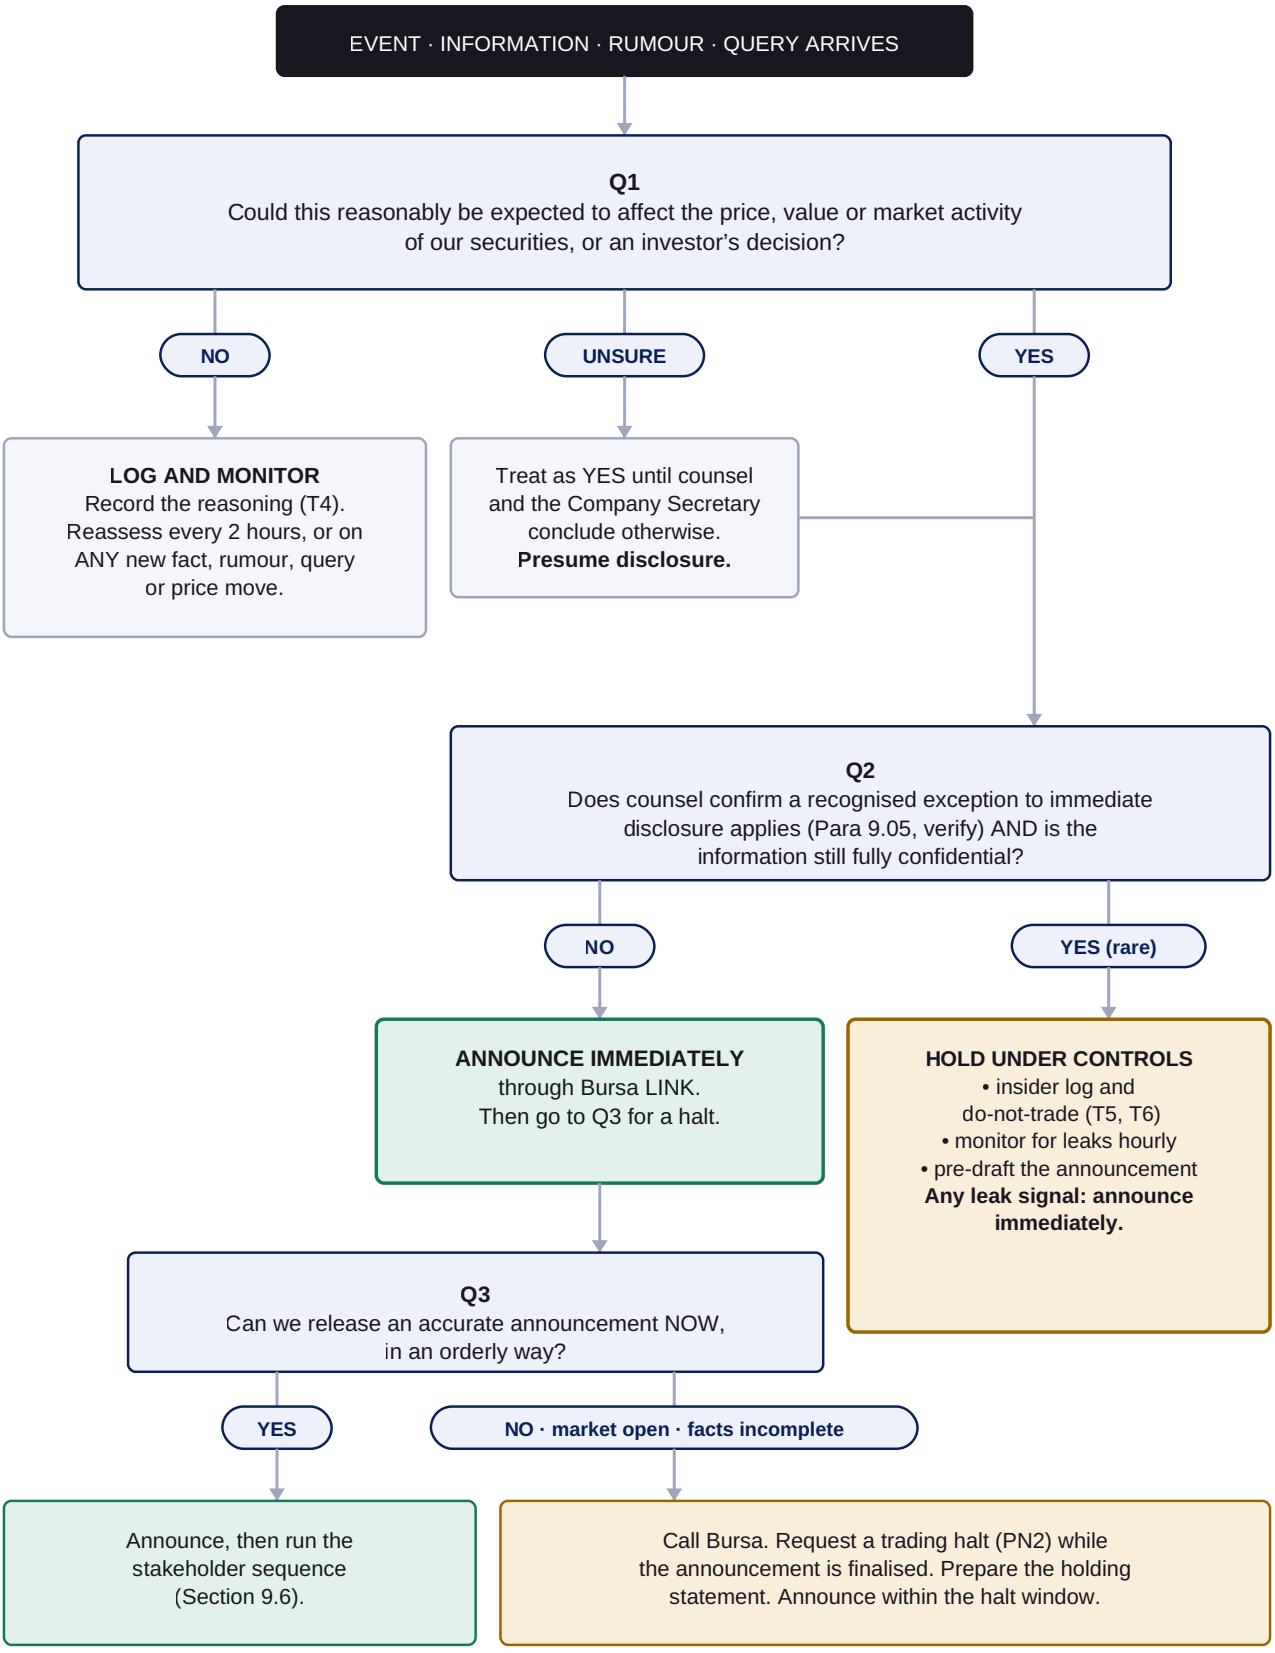

FIGURE · DISCLOSURE DECISION TREE (SECTION 9.2)

9.3

Writing a good Bursa announcement

Standard content (adapt to the incident type):

1. **Heading** — Company name and a plain, specific subject. Avoid euphemism.
2. **Opening** — "The Board of Directors of [Company] wishes to announce that…" followed by the core fact in one or two sentences.
3. **What happened** — date, time, place, nature; how discovered.
4. **Who/what is affected** — people, operations, customers, assets, data.
5. **Financial and operational impact** — quantify where possible; if not yet quantifiable, say so and say when you expect to update.
6. **Actions taken** — containment, authorities notified, investigations commissioned.
7. **Next steps** — what will be announced next and roughly when.
8. **Compliance statement** — a reference to the relevant Listing Requirements paragraph where your counsel recommends one.
9. **Authorisation** — "This announcement is made pursuant to Paragraph 9.03 of the Main Market Listing Requirements" (or the ACE Market equivalent) [V], and board/authorised-person details.

Style rules: plain English; no adjectives of reassurance ("minimal", "negligible", "robust") unless you can prove them; no forward-looking statements without a stated basis; no speculation on cause or fault; no promotional language; do not "bury" the lead behind background.

Mechanics (confirm with your Company Secretary): announcements are submitted through Bursa LINK in the appropriate announcement type with a free-text narrative [V]. Keep **at least two authorised submitters** on file with tested credentials and a manual back-up route agreed with Bursa, because the day you need to announce is the day the primary submitter is on a flight.

9.4

Trading halts (suspension on issuer request)

When to consider a halt

- Material information exists and **cannot be announced immediately** in an accurate, orderly manner while the market is open.
- A leak has occurred and the market is trading on rumour, but the facts are not yet confirmed enough to announce.
- A major transaction, default, regulatory action or board event is being finalised.

How (indicative; confirm with counsel and Bursa)

1. Telephone your Bursa relationship contact **before** filing; explain the basis.
2. File the request under Practice Note 2 (Requests for Suspension) of the Main Market Listing Requirements (press examples cite sub-paragraphs 3.1(a) and 3.1(b)) [C].
3. The request states the reason and the proposed period. Press examples show suspension from market open until 5 pm on the following market day pending a "material announcement" [C]; Bursa decides.
4. Prepare the announcement to be released within the halt period; resume of trading follows Bursa's process.
5. Brief IR, the Board and the spokespersons: a halt is itself a signal. Prepare a one-line holding message: *"The company has requested a trading suspension pending an announcement. We will announce as soon as we are able to."*

Do not request a halt as a way to buy time for a decision that you could have made. A halt that expires without an announcement damages credibility and may attract questions.

9.5

Unusual market activity (UMA) queries and rumours

What a UMA query asks. Typically: whether the company is aware of any unannounced corporate development, matters under negotiation, any rumour or report, or any other explanation for the trading pattern, and whether it is complying with Para 9.03 [C].

Protocol

1. **Treat it as a Level 3 trigger**, even if the answer will turn out benign.
2. **Read the query's deadline** and put it on the clock board.
3. **Do real due enquiry** — not a "tick-box". Ask each director, key management personnel, the heads of major subsidiaries, relevant advisers and the controlling shareholder (through the right channel) whether they are aware of anything that might explain the activity. Record who was asked, when, and their answer.
4. **Check the last 30 days** of internal events: board papers, term sheets, regulator letters, rating-agency contacts, major customer or lender discussions, incident reports.
5. **Check for leaks**: media queries, social chatter, unusual calls from analysts or brokers.
6. **Draft the reply** with Legal and Company Secretary. State what you did to enquire; then state, accurately, whether there is anything to disclose. If there *is* undisclosed material information, the reply must disclose it (or, if it exists but needs to be announced simultaneously, announce in the same release).
7. **Board endorsement** before release [C].
8. **Keep the file**: the enquiry record is your defence if the reply is later challenged.

> ⚠ **Why this matters.** Bursa has publicly reprimanded issuers and fined their directors (examples carried in 2017 enforcement releases for Lay Hong Berhad and Tecnic Group Berhad) for breaches connected with their UMA responses [C]. A glib or inaccurate UMA reply is among the highest-penalty communications errors a PLC can make.

Rumours and press reports that are not a UMA query. If a media report or market rumour concerns material information:

- If it is **true or substantially true** → announce.
- If it is **false or materially inaccurate** and may mislead the market → consider a prompt clarification announcement; discuss with Bursa and counsel [V].
- If **partly true** → announce the true part, correct the rest.
- Do **not** say "we do not comment on market rumours" if the rumour concerns material information and trading is active.

9.6

The stakeholder communication sequence for a material event

STEP	ACTION	TIMING
0	Safety and containment	Immediately
1	Board Chair / ARC Chair informed	≤ 1 hour

STEP	ACTION	TIMING
2	Halt decision (if needed)	Before announcement, market open
3	**Bursa LINK announcement**	As soon as accurate
4	Press release (EN + BM), website, corporate social accounts	Same moment as step 3 or immediately after
5	Staff note and manager talking points	Within minutes of step 3
6	Key institutional shareholders, lenders, rating agencies, regulators — "heads-up" calls limited to *public* information	Within hours
7	Customers/partners/suppliers affected	Within hours, targeted
8	Analyst briefing / investor call (public information only)	After step 3; same day if possible
9	Retail shareholder explainers (BM, Chinese, English), Q&A on website	Within 24 hours
10	Follow-up announcement when facts change	As needed

Life-safety and legal-notice exceptions: evacuation notices, customer safety warnings (for example "stop using product X"), and statutory notifications to regulators or affected individuals may go before the Bursa announcement when delay would increase harm or breach a legal deadline. Where that happens, notify Bursa at the same time and announce at the earliest practicable moment.

9.7 Periodic reporting during and after a crisis

- Quarterly and annual deadlines still apply [C] (quarterly within two months of quarter-end; annual report within four months of financial year-end).
- A crisis may affect **recognition, impairment, provisions, contingent liabilities and going-concern assessments**. Involve the CFO and external auditors early. Audit-related events (qualified opinions, going-concern emphasis, auditor resignation) are disclosure events and can have regulatory consequences, including under PN17/GN3 [V].
- Align crisis messaging with the numbers: statements saying "no material impact" followed by a big impairment destroy credibility.

9.8 Controlling inside information — the "no trading" machinery

Legal backdrop. Insider trading and communicating inside information are criminal offences under the CMSA (s.188), with imprisonment of up to ten years and fines of not less than RM1 million reported in SC releases [C] *(verify figures)*; the SC may also bring civil proceedings [C].

Steps (first hour)

1. **Open the insider log** (Template T5): name, role, time they learned, what they know, how they were told.
2. **Send the do-not-trade and confidentiality notice** (Template T6) to everyone on the log, with a confirmation reply.
3. **Pause corporate dealings**: share buy-backs, ESOS/ESS exercises or grants if within company control, private placements and other equity issuance, and any scheduled director/employee dealings — until the information is public (confirm each with counsel) [V].

4. **Directors and key management:** remind them of Chapter 14 notification duties and any closed-period restrictions; confirm the current rules with the Company Secretary V.
5. **Advisers:** confirm that external advisers (law firms, PR agency, auditors) are under confidentiality undertakings and are also on the log.
6. **Need-to-know:** the smaller the circle, the smaller the leak risk — and the smaller the number of people you must prove did not trade.
7. **Leak response:** if a leak is suspected, treat it as the end of the confidentiality window (Section 9.1 rule 3).

9.9 Dealing with controlling and major shareholders

- The controlling shareholder, GLIC anchors and other major holders **do not** get earlier access to material undisclosed information as a courtesy.
- If you must consult a major shareholder to take a decision (for example a rights issue, restructuring or board change), do so under written confidentiality with a clear understanding that they become insiders, restrict their dealings, and keep the list.
- Where the controlling shareholder wants to speak publicly, coordinate: their statement can itself be market-sensitive and may require disclosure by the company.

9.10 Investor relations in a crisis

- **Quiet period.** Pause analyst meetings, roadshows and one-on-ones unless they are consistent with public information. Use scripted, pre-cleared material.
- **After announcement:** hold an analyst briefing or call within 24 hours; publish the transcript or key points on the website for equal access.
- **Q&A discipline:** answer from public information. "We can't comment beyond our announcement" is acceptable; guessing is not.
- **Guidance:** do not issue earnings guidance or forecasts while you are unable to quantify the impact. If you must retract prior guidance, do so through Bursa.
- **Sell-side and buy-side:** record all contacts in an IR log. A fund manager calling at 7 am asking "is it true that…" gets the same answer as everyone: refer to the announcement.
- **Retail:** short explainers in BM and Chinese (and English), plain language, published on the website and shared with retail-facing platforms **after** the Bursa announcement.
- **Proxy advisers and MSWG:** proactive outreach with the same public information; anticipate AGM/EGM questions.

9.11 Lenders, trustees, rating agencies, auditors

COUNTERPARTY	WHY	ACTION
Lenders and facility agents	Covenant breaches, material-adverse-change and event-of-default clauses	CFO and Legal review every facility agreement within hours; notify as required; seek waivers early
Sukuk/bond trustees and holders	Disclosure and default provisions in trust deeds	Review trust deed; align timing with Bursa announcement
Rating agencies (for example RAM Ratings, MARC Ratings — as applicable to your issuer)	Rating action or outlook change	CFO leads; only public information unless under proper confidentiality

COUNTERPARTY	WHY	ACTION
External auditors	Financial statement impact; audit opinions; independence	ARC Chair and CFO brief early; auditors may need to be consulted before public statements about numbers
Insurers and brokers	Policy notification conditions	Notify promptly; use panel vendors where policy requires

9.12

General meetings and special situations

- If a crisis arises before an AGM/EGM, brief the Chair on likely questions; prepare a "statement at AGM" with the same facts as the last announcement; ensure responses to shareholders are consistent with what the market has been told.
- If the crisis involves a **take-over approach, contested vote, activist campaign or boardroom dispute**, engage specialist advisers immediately and follow the SC take-over rules [V].
- If **the Exchange or SC contacts you** at any hour, the Company Secretary and Legal lead the response; do not rely on PR to manage regulator contact.

10

Stakeholder map

Every stakeholder has an owner, a channel and a place in the order relative to the Bursa announcement.

10.1

Priority and ownership

STAKEHOLDER	WHAT THEY NEED	OWNER	CHANNEL	LANGUAGE	TIMING RELATIVE TO BURSA ANNOUNCEMENT
Affected people & families	Safety, information, care, respect	HR + Ops head	In person / phone / dedicated hotline	Their language	**Before** public naming; never learn from media
Employees (all levels, incl. contractors & migrant workers)	What happened, what to do, job security, what to say to outsiders	HR + Comms	Town hall, email, intranet, WhatsApp broadcast via managers	BM, EN, Mandarin, Tamil, other as needed	Same time as announcement (or earlier for safety)
Board of Directors	Full picture, options, personal liability	Crisis Lead + CoSec	Phone, secure board portal	EN	First, before the market
Bursa Malaysia / SC	Accurate, timely, complete information	CoSec + Legal	Bursa LINK; direct calls; letters	EN	Per rule
Other regulators / authorities	Compliance, cooperation	Legal / Compliance / HSE / CISO	Formal notifications	EN / BM	Per statutory clock
Controlling and major shareholders	Impact on value; governance	Chair / CEO / IR	Calls under confidentiality rules	EN	After announcement (public info)
Institutional investors / analysts	Impact on earnings, balance sheet, governance	CFO / IR	Call, webcast, Q&A	EN	After announcement
Retail shareholders	Plain explanation, "is my money safe?"	IR + Comms	Website, social, explainer, Q&A	BM, EN, Chinese	After announcement; within 24 h
MSWG & governance watchers	Governance response	Chair / IR	Meeting / letter	EN / BM	After announcement
Lenders, trustees, rating agencies	Covenants, liquidity	CFO	Calls, letters	EN	As per documents; after announcement for public items
Customers / clients	Safety, service continuity, compensation	Business heads + Comms	Direct notice, website, hotline	BM, EN, Mandarin, Tamil	Same time or just after
Suppliers / partners / franchisees	Payment, continuity	COO / Procurement	Direct calls / email	Local	Hours after
Media	Facts, access, voices	Comms	Statements, briefings, interviews	BM, EN, Mandarin, Tamil	Same time as press release
Communities / local authorities / NGOs	Safety, environment, local jobs	Sustainability / Regional head	Meetings, community notices	Local languages	Early where affected

STAKEHOLDER	WHAT THEY NEED	OWNER	CHANNEL	LANGUAGE	TIMING RELATIVE TO BURSA ANNOUNCEMENT
Government / ministries / political stakeholders	Public interest, jobs, regulation	Government Relations lead	Calls / meetings	BM / EN	Coordinated; no market-sensitive leakage
Unions / employee associations	Welfare, process	HR	Meetings	BM / EN	Early
Embassies / consulates (foreign workers)	Welfare of nationals	HR / Legal	Formal channel	—	Immediately where nationals are affected

10.2 Maintaining the register

Maintain a live stakeholder database with names, roles, mobile numbers, preferred language and relationship owner. Test it twice a year. Where relationships are with individuals (for example senior editors or regulators' officers), attach the **relationship owner** to each name.

11

Messaging framework and Q&A

Every first statement answers the same five questions in the same order: acknowledge, care, action, accountability, next.

11.1

The Five-Line Core Statement

Every first statement answers five questions, in this order:

LINE	PURPOSE	EXAMPLE FRAME
1. Acknowledge	What happened — verified facts only	"[Company] confirms that [fact] occurred at [place] on [date/time]."
2. Care	Who is affected and how we are helping	"Our first priority is [people]. We are [support actions]."
3. Action	What we are doing now and who is involved	"We have [contained/stopped/notified]. [Authority] is involved."
4. Accountability	What we will find out and report	"We will establish the cause. We will share what we learn."
5. Next	When and where the next update comes	"We will update at [time] on [channel]."

11.2

Message hierarchy

- **Core narrative (one sentence).** The one thing we want a tired journalist or a worried investor to remember.
- **Three proof points.** Facts that support the narrative — numbers, actions, independent verifications.
- **Audience-specific adaptations.** Employees (job security and safety), customers (service and safety), investors (financial and governance), regulators (compliance and cooperation), communities (impact and care).

11.3

Language rules

Do

- Short sentences, active voice, concrete verbs.
- Name the problem. Use the word people already use.
- Apologise when responsibility is clear and the apology is sincere.
- Show empathy before explanation.
- Give next-update times.

Don't

- "No comment."
- "Isolated incident" unless you can prove it.
- "Minimal impact" or "no material impact" without evidence — and never before you've done the materiality assessment.

- Blame individuals, victims, regulators, journalists or social media.
- Speculate on cause, fault or legal outcome.
- Use legalese for the public statement.
- Make promises you can't keep ("it will never happen again").
- Name victims before next of kin have been informed.
- Release anything that could be read as a forward-looking financial statement without proper basis.

11.4

The hard-questions bank (prepare answers with Legal before you need them)

#	LIKELY QUESTION	ANSWER PRINCIPLE
1	What exactly happened?	Verified facts; say what is unknown
2	When did you first know?	Honest timeline; discrepancies destroy trust
3	Why did it take so long to tell us?	Own the timeline; explain what was verified when; show you disclosed promptly once material
4	Is anyone hurt / is anyone's data lost?	Precise; never "no evidence" unless forensics support
5	Who is responsible?	Investigation will determine; accept responsibility for what is clearly yours
6	Did the Board / CEO know?	Facts only; if unknown, say review under way and by whom
7	Will the CEO / directors resign?	Governance principle: Board will act on findings; avoid pre-judging
8	Is the company still solvent / is dividend safe?	Only what is public; avoid guidance you cannot back
9	Will jobs be lost?	Honest, humane; no promises you cannot keep
10	Are regulators investigating?	Confirm that you are cooperating; avoid detail beyond what is public
11	Is this a cover-up?	Point to transparency measures, independent review, decision timeline
12	Why did the share price move before the announcement?	Do not speculate; reference the UMA reply and the announcement timeline
13	Is the product / service safe now?	Specific safeguards; independent verification if possible
14	What compensation will affected people receive?	Concrete process; do not prejudge amounts
15	Is the problem bigger than you've said?	"We will tell you as soon as we know, through Bursa and our website"
16	Have you paid / will you pay a ransom?	Per Board decision and legal advice; avoid operational detail that helps attackers
17	Is this connected to [politician / competitor / shareholder]?	No speculation; stick to facts
18	Have you spoken to the Minister / MACC / police?	Confirm contact appropriately; no detail beyond what is public

#	LIKELY QUESTION	ANSWER PRINCIPLE
19	What are you doing to prevent recurrence?	Specific commitments with dates
20	How can I trust you now?	Behaviour over words: independent review, published milestones

12

Media playbook

Know the media landscape before the crisis, and say the same thing in the same words to every outlet.

12.1

Media landscape (illustrative — maintain your own list)

SEGMENT	EXAMPLES (ILLUSTRATIVE, NOT EXHAUSTIVE)	NOTES
Wire & national agency	Bernama, Reuters, Bloomberg	Fast; others pick up
English business & general	The Edge, The Star, New Straits Times, Malay Mail, Free Malaysia Today, The Business Times (SG), Nikkei Asia	Influence investors
Bahasa Malaysia	Berita Harian, Harian Metro, Sinar Harian, Kosmo!, Utusan Malaysia	Reach mass audiences and Malay-speaking stakeholders
Chinese-language	Sin Chew Daily, China Press, Nanyang Siang Pau, Oriental Daily	Reach Chinese-speaking investors and consumers
Tamil-language	Tamil Nesan, Makkal Osai and others	Community reach
Broadcast & digital	Astro Awani, TV3, BFM, Malaysiakini, CNA	Live coverage and fast cycles
East Malaysia	Borneo Post, Daily Express (Sabah), Utusan Borneo and regional broadcasters	Treat as first-tier in East Malaysia crises

12.2

Media operating procedures

1. **Single door.** All media queries to Comms. Staff are told: "Refer all enquiries to [name, number]. Do not respond, do not post."
2. **Log every query** (Template T19): outlet, journalist, time, question, deadline, owner, response, outcome.
3. **Acknowledge in 15–30 minutes.** "We have your query; we will respond by [time]." Silence breeds speculation.
4. **Fact-check before replying.** Two sources for any fact. If you cannot confirm, say "we are verifying".
5. **Bursa-first on material items.** Do not give a journalist information that is material and undisclosed. If a journalist already has it, treat as a leak (Section 9.1).
6. **Consistency.** Same facts to all outlets, in all languages. Offer exclusives only if you are comfortable the exclusive does not become selective disclosure.
7. **On the record by default.** "Off the record" and "background" arrangements are agreed in advance, explicitly, and only by experienced people. Assume anything said can be quoted.
8. **Correct errors fast and politely.** Send the source document or the Bursa announcement; request a correction; avoid public fights.
9. **Legal letters** (demand, right of reply) are sent only on advice and with the Crisis Lead's approval.
10. **Premises.** Security briefed on media, filming and drones. Designate a media area away from sensitive operations and bereaved families.

12.3 Statement format

Standard press statement (Template T7–T12): headline, 3–5 short paragraphs following the Five-Line Core Statement, spokesperson quote, background boilerplate, media contact. Issue in English and BM together; Mandarin and Tamil within hours where relevant.

12.4 Interviews and doorstops

- **Prepare:** three key messages, five hard questions (11.4), and bridging phrases.
- **Bridging:** "What matters most right now is…", "I can't speculate on that, but what I can tell you is…", "That's a fair question; here's what we know today…"
- **Never** improvise on legal liability, cause, share price or the personal circumstances of those involved.
- **Avoid doorstops** (impromptu corridor interviews). A podium, a prepared statement and a time limit are your protection.
- **Photos and video:** use the company's own footage where appropriate; do not allow staging of victims or families.

12.5 Press conference run-sheet (Template T19 contains the full version)

1. Bursa announcement made **before** the conference.
2. Venue controlled; backdrop neutral; language support (BM, English, others as needed) arranged.
3. Lead spokesperson delivers a 3–5 minute statement; technical expert on hand.
4. Q&A limited to 20–30 minutes; moderator ensures East Malaysia and non-English media get questions.
5. Press kit: statement, fact sheet, timeline, Q&A (public information only), contacts.
6. Debrief within 30 minutes; log what was said; correct any slip immediately (and if the slip is market-sensitive, consider a Bursa clarification).

12.6 Media monitoring

Set up real-time monitoring across English, BM, Chinese and Tamil press, broadcast, and social platforms. Assign an analyst to flag: new facts, errors, tone shifts, politician/regulator comments, East Malaysia coverage, and any content that touches 3R. Report to the CMT hourly in the first 24 hours.

13

Digital and social media

Triage what appears online by signal: verify new facts, correct errors once, and do not argue with legitimate criticism.

13.1

Monitoring and triage

SIGNAL	ACTION
New fact surfaces that we have not confirmed	Verify, log, brief CMT
Factual error spreading	Correct once, on official channels, with the source
Hostile but legitimate criticism	Do not argue; address substance through official statements
Harassment or doxxing of staff	Support staff; report to platform; Legal on police report
Scam, impersonation, fake announcement or deepfake	Warn publicly; report to platform; escalate to Legal/CISO (Scenario S13)
3R-sensitive content	Immediate Level 3; Legal + senior leadership
Politicians/regulators commenting	Notify Government Relations; align statements

13.2

Operating rules

- **Pause** all scheduled and automated posts, ads and campaigns across all accounts at activation.
- **Pin** the official statement and link to the dedicated crisis page (the "dark site", Section 18.2).
- **Respond in the language of the post** wherever possible.
- **Official channels only**: corporate accounts do not reply to individual posts with argument; use the pinned statement and the hotline.
- **No deleting** of existing company posts without Legal approval (evidence and perception).
- **Platform reporting** (Online Safety Act context): use user-reporting routes for fraud, impersonation and genuinely harmful content C; do not file takedown requests against legitimate criticism.
- **Ads:** consider pausing paid media; consider search-ad buys for "[company] + incident" to point to official facts.
- **WhatsApp:** prepare broadcast-list copy for staff, agents, dealers and retail investors; do not pretend that a company message won't be forwarded.
- **Scheduled posts after the crisis:** resume only on explicit CMT approval, with tone checks, and avoid festive or celebratory content for an appropriate period.

13.3

Employee social media

Remind employees (Template T15) not to post about the incident, speculate, share internal documents or respond to journalists, and provide them with official facts they *may* share. Do not threaten; explain. Staff who see inaccurate content should send it to Comms.

13.4

Dark site and crisis page

Build in advance (Section 18.2) a ready-to-activate web page with: statement, timeline, FAQs, contact information, links to Bursa announcements, safety instructions, and updates feed. Host independently from your main site if possible so that a cyber incident or traffic surge does not take it down.

14

Internal communications

Employees hear it no later than the public, through their managers, in the languages they actually read.

14.1 Principles

- Employees are **your first stakeholders and your most credible voice**, and also your biggest leak risk.
- Employees hear it from you **no later than the public** — ideally at the same moment as the Bursa announcement for material events; earlier for safety instructions. (Employees may be insiders: remind them of the do-not-trade rules.)
- **Managers are the channel.** Equip them with a 5-bullet talking-points card (Template T15) within an hour of the public statement.
- Include **contractors, outsourced staff and migrant workers**; use the languages they actually read.

14.2 Content

- What happened and what we know; what we don't know yet.
- What we are doing.
- What they should do (safety, work arrangements, how to refer calls).
- What they must *not* do (post, speculate, trade).
- How to raise concerns (including the whistleblowing channel); non-retaliation assurance.
- Next update time.

14.3 Channels

Email, intranet, SMS, WhatsApp broadcast via managers, notice boards for operations without desktop access, town halls (in person and streamed), and a staff hotline. Use a written note *plus* a live briefing: a note alone feels cold, a briefing alone isn't recorded.

14.4 Leaks and discipline

Assume anything circulated internally can be leaked. Draft internal notes as if they will be read aloud on television. Where leaking is serious, handle through HR and Legal; do not discipline in ways that look like retaliation against whistleblowers (Whistleblower Protection Act 2010 V).

14.5 Staff support

Counselling, family liaison, flexible working, and clarity on pay and leave. After fatalities or violent events, plan memorials and leave sensitively and in consultation with the families and community.

PART D OF F

D

Scenario playbooks

Thirteen scenario playbooks, one page each.

15 Scenario playbooks 51

15

Scenario playbooks

Thirteen scenarios, each with its first sixty minutes, its disclosure checkpoints and the pitfalls to avoid.

How to use these

Each playbook lists: **Triggers · First 60 minutes · Disclosure and regulatory checkpoints · Priority stakeholders · Message pillars · Pitfalls · Prepare in advance.** They assume you have already worked through the generic first-hour sequence in Section 2. Regulatory references carry the same C/V tags as Section 5. They are prompts for the CMT and counsel — not a substitute for legal advice on the facts.

CODE	SCENARIO
S1	Cyber attack, ransomware, data breach
S2	Workplace fatality, major accident or environmental release
S3	Product safety, recall, contamination, halal-integrity concern
S4	Accounting irregularity, restatement, auditor issue, going-concern doubt
S5	Corruption allegation, MACC investigation, arrest or remand of a director/executive
S6	Short-seller report, market rumour, UMA query or take-over approach
S7	Leadership and governance crisis — misconduct, sudden exit, boardroom or shareholder fight
S8	Regulatory enforcement, licence action, raids or investigation
S9	Financial distress — default, liquidity, rating downgrade, PN17, winding-up petition
S10	Litigation, class action, major contract loss
S11	Natural disaster, pandemic, geopolitical or supply-chain disruption
S12	Social-media storm, 3R-sensitive content, boycott, ESG/forced-labour allegations
S13	Misinformation, deepfake, impersonation or fake announcement

S1

Cyber attack, ransomware, data breach

In a ransomware incident the first hour is won by controlling who knows, not by fixing systems.

Triggers: system outage; ransom note; unusual outbound data traffic; notification from a third party/ law enforcement/security researcher; data posted on leak sites; customer complaints about scam calls referencing your data.

First 60 minutes

1. CISO/CIO isolates affected systems and engages the **retained incident-response firm** and **cyber insurer's hotline** (policy terms often require approved vendors and prompt notice V).
2. Move the CMT to the **out-of-band channel** (Section 6.6). Assume email and chat may be monitored.
3. Legal hold; instruct staff not to wipe or "clean" machines.
4. Disclosure Committee runs the materiality screen: operational outage, data volume/sensitivity, customer impact, regulatory exposure, extortion.
5. Prepare a holding statement (T9) and a customer-safety message (scam warnings, password resets).

Disclosure and regulatory checkpoints

- **Bursa:** assess materiality early; outage of core operations, loss of customer data or an extortion demand can each be price-sensitive. In March 2026 Bursa Malaysia itself publicly stated that cyber incidents at several brokers were contained to the brokers' internal systems, with no impact on its own networks or trading platforms and no evidence of unauthorised trading — a useful model for the kind of structured statement (containment, scope, absence/presence of financial loss, steps taken) that regulators and investors want C *(news report)*.
- **PDPA:** notifiable personal data breach — PDPC within 72 hours (as soon as practicable); affected individuals no later than 7 days after PDPC notification; late-notice explanation required C. Prepare the PDPC form and the individual-notice template in advance.
- **Cyber Security Act 2024:** if you are a designated NCII entity — immediate electronic notice to NACSA and your sector lead; 6-hour and 14-day reports C.
- **Financial sector:** BNM RMiT incident notification and customer communication duties V.
- **Law enforcement:** PDRM commercial-crime/cyber units and national CERT-type bodies as advised by counsel/the IR firm V.
- **Ransom:** a Board decision after legal advice (sanctions, anti-money-laundering, insurance, law-enforcement guidance) V; never delegate to IT or Comms.

Priority stakeholders: affected customers/employees; regulators; Bursa/market; insurers; critical partners whose systems connect to yours.

Message pillars: "We detected… We isolated… We engaged independent experts… We have informed the authorities… Here is what you should do… We will inform you directly if your data is affected… We will update at…"

Pitfalls: declaring "no evidence of data theft" before forensics can support it; sharing technical detail that assists the attacker; going quiet on staff (leading to rumours on WhatsApp); letting the CISO speak publicly without media training; promising full restoration dates you cannot meet; conflating "contained" with "resolved".

Prepare in advance: retained incident-response firm; cyber-insurance panel; tested out-of-band channel; pre-drafted customer notices (EN/BM); PDPC form data pre-collected (controller details, DPO contact); data map showing where personal data lives; legal view on ransom policy; a "notification matrix" mapping data type → regulator → clock.

S2

Workplace fatality, major accident, environmental release

People come first: families hear before the public, and nobody is named, blamed or second-guessed.

Triggers: fatality or serious injury at plant/site/construction; fire, explosion, structural failure; chemical leak; spill; transport accident; community complaints.

First 60 minutes

1. Emergency response; BOMBA/ambulance/police as required; secure the scene.
2. **Next of kin** are contacted personally by HR/senior leader — *before* any public naming. For foreign workers, notify the relevant embassy/consulate through the proper channel V.
3. HSE head notifies DOSH (JKKP) — immediately by the quickest means; written report within 7 days C *(secondary)*; DOE for environmental releases per licence V.
4. Preserve the scene and records; Legal hold; cooperate with authorities.
5. Holding statement (T8), staff note, hotline for families.

Disclosure and regulatory checkpoints

- **Bursa:** assess materiality — fatalities, plant shutdown, licence suspension, legal liabilities, insurance and reputational impact. For significant sites, treat as potentially material from the outset; announce facts and impact when verified.
- **PERKESO/SOCSO:** employment-injury processes V.
- **Insurers:** immediate notice.
- **Authorities:** DOSH, DOE, PDRM, BOMBA, local authority — one liaison person per authority.

Priority stakeholders: families; injured; colleagues on site; unions; authorities; community; customers dependent on the site; Bursa/market.

Message pillars: condolence and care first; cooperation with authorities; facts only; stop-work/safety review; commitment to learn; what support families receive; when the next update is.

Pitfalls: naming victims before families are told; implying blame on the victim or contractor; photos of the scene shared by staff; spokesperson speculating on cause; proceeding with marketing or celebrations; restarting operations before authorities permit; ignoring migrant-worker families who may be abroad.

Prepare in advance: family liaison protocol; staff trained for next-of-kin notification; embassy contact list; relationships with local DOSH/BOMBA offices; site holding statements; media access plan for remote sites; Sabah/Sarawak logistics.

S3

Product safety, recall, contamination, halal-integrity concern

A recall is judged on how fast and how clearly customers can act, so do not minimise and do not recall in stages.

Triggers: consumer illness reports; regulator notice; test failures; supplier contamination; foreign object; mislabelling; halal certification challenge; viral photo/video of a defect.

First 60 minutes

1. Quality/QA freezes affected batches; identifies scope; decision-maker for **stop-sale / recall** named.
2. Regulator route: Ministry of Health (food safety, NPRA for pharmaceuticals), Medical Device Authority, KPDN, and for halal issues the relevant halal certifying authority (JAKIM or state religious authorities) V.
3. Customer-safety message (T10) — what product, what lot, what to do, how to get a refund — in BM, English, Chinese, Tamil.
4. Retail, e-commerce and distributor notices; pull from shelves; marketplace listings removed.

Disclosure and regulatory checkpoints

- **Bursa:** recalls can be material by cost, brand, customer concentration or regulatory consequence.
- **Halal:** a halal-integrity concern is both a compliance issue and an issue of public trust; engage the relevant authority at once; avoid defensive language.
- **Insurance:** product recall policy conditions V.

Priority stakeholders: consumers; retailers; regulators; religious authorities where relevant; employees; suppliers.

Message pillars: safety first; clear identification of affected products; how to get refund/replacement; cooperation with authorities; what has changed.

Pitfalls: minimising ("isolated"); partial recalls that expand later; slow or hard-to-find refund process; blaming suppliers publicly; not translating notices.

Prepare in advance: traceability systems; recall plan with regulator contacts; consumer hotline; retailer contact tree; halal-assurance documentation and authority contacts; pre-drafted recall notices (EN/BM/Chinese/Tamil — native-speaker reviewed).

S4

Accounting irregularity, restatement, auditor issue, going-concern doubt

Do not deny or reassure before the facts: early denials and management investigating itself are the usual failures.

Triggers: whistleblower report; internal audit finding; auditor query or resignation; regulator enquiry; short-seller allegation; discovery of unrecorded liabilities or fictitious receivables.

First 60 minutes

1. **ARC Chair** assumes oversight; matter goes to a confidential workstream; **management involved in the area is walled off**.
2. Legal retains forensic accountants/investigators reporting to the ARC (not to management). Privilege approach confirmed with counsel [V].
3. Disclosure Committee runs materiality screening, with the **auditors** consulted as appropriate.
4. Stop all financial guidance and IR meetings; trading restriction on everyone with knowledge (Section 9.8).
5. Prepare a holding statement (T11/T12) that confirms an independent review without prejudging findings.

Disclosure and regulatory checkpoints

- **Bursa:** accounting irregularities, auditor resignation/removal, qualified opinion, going-concern emphasis and delayed reporting are all potentially disclosable or consequential events; confirm the exact paragraphs [V]. Reporting deadlines still run (quarterly within two months, annual within four months) [C].
- **PN17/GN3:** assess whether equity or going-concern positions could trigger classification [C/V].
- **SC:** possible enquiries or investigation; coordinate through Legal.
- **Auditors:** their reporting duties may force timeline decisions.

Priority stakeholders: Board/ARC; auditors; Bursa/SC; lenders; institutional investors; employees in finance; media.

Message pillars: independent review, commitment to transparency, protecting stakeholders, timetable for updates; no conclusions until findings.

Pitfalls: early denials; reassurance before facts; management-led investigations of themselves; leaks to selected analysts; "temporary" cash-flow explanations that conflict with later findings.

Prepare in advance: whistleblowing policy and independent channel; ARC protocols for investigations; panel of forensic advisers; template language for "independent review announced"; clear delegations for auditor contact.

S5

Corruption allegation, MACC investigation, arrest or remand of a director or executive

Do not attack the authority or defend the individual; assess disclosure promptly and keep the implicated person from speaking for the company.

Triggers: MACC raid or call-up; arrest/remand; media exposé; whistleblower complaint; foreign enforcement agency enquiry.

First 60 minutes

1. Legal manages interaction with the authorities; staff are told to be polite, cooperate within the law, and **call Legal immediately**; no destruction of documents.
2. **Compromised-leader protocol** (Section 6.4): recuse implicated persons; interim arrangements; ARC Chair/Lead INED oversight.
3. Check **s.17A MACC Act** posture: is the organisation exposed through an associated person; are adequate procedures (TRUST) documented C.
4. Disclosure Committee runs materiality screening, including implications for licences, customers, financing and board composition.
5. Holding statement (T11/T12): acknowledge awareness, state cooperation, avoid commenting on the merits, affirm presumption of innocence and company values.

Disclosure and regulatory checkpoints

- **Bursa:** arrest of a director/executive or investigation of the company can be price-sensitive; assess promptly and announce facts; update as developments occur.
- **Directors' duties and board composition:** consider recusal, leave, or suspension; check constitution and Listing Requirements for implications of the director's status V.
- **Whistleblowers:** protect; never try to identify V.
- **Lenders/customers/government contracts:** check termination/debarment clauses.

Priority stakeholders: Bursa/market; regulators; Board; lenders; key customers/government counterparties; employees.

Message pillars: cooperating fully; independent review; zero tolerance for corruption; interim governance measures; presumption of innocence; commitment to update.

Pitfalls: attacking the authority; defending an individual publicly before facts; hiding behind "personal matter"; ignoring the corporate-liability dimension; letting an implicated person speak for the company.

Prepare in advance: documented adequate-procedures framework (TRUST) with evidence; dawn-raid protocol; delegated authority and alternates; regular training; whistleblowing channel tested.

S6

Short-seller report, market rumour, UMA query, take-over approach

A leak signal ends the confidentiality window: answer the specific allegations, consider a halt, and keep insiders out of the market.

Triggers: published short report; unusual price/volume; Bursa UMA query; news or social rumours about a deal, results or defaults; unsolicited approach by a potential acquirer; activist letter.

First 60 minutes

1. Level 3 immediately. Disclosure Committee, external counsel, IR and Comms meet.
2. **Fact-check the allegations** line by line with the relevant business and finance leads. Sort into *true*, *partly true*, *false*, *cannot yet determine*.
3. For a **UMA query**: follow Section 9.5 — real enquiry, board-endorsed reply, deadline on the clock board.
4. For a **take-over approach** or leak about a transaction: take specialist advice on the SC take-over rules and announcement duties V.
5. For a **short report**: assess whether any allegations, if true, would be material; consider a measured, factual response via Bursa; avoid personal attacks on the author; consider independent verification of key points.

Disclosure and regulatory checkpoints

- Treat any leak signal as the end of the confidentiality window C.
- Consider **trading halt** if you cannot respond accurately while the market is open (Section 9.4).
- Align every statement with the actual position; avoid statements that could be read as market manipulation or misleading disclosure V.

Priority stakeholders: Bursa/SC; shareholders; analysts; lenders; employees; media.

Message pillars: "We take these claims seriously and have reviewed them. Here are the facts we can verify…"; "The Board has commissioned [independent review]"; "We will update…".

Pitfalls: blanket denials that later prove wrong; legal threats as the first public response; failure to answer the specific allegations; selective briefing of favoured investors; trading by insiders; buy-backs while in possession of inside information.

Prepare in advance: red-team exercise — have someone write the short report on you; document your vulnerabilities and evidence; pre-agreed escalation to the Board; relationships with analysts; templates for UMA replies (T14C).

BOLD PLAY

"Write the short report yourself." Once a year, give a small independent team the brief: find the three claims that would hurt us most, using only public information. Fix what is fixable; pre-draft answers to what is not.

S7

Leadership and governance crisis

Keep one Board voice in a governance fight: no selective briefing, no public sparring, no successor named before the Board decides.

Triggers: CEO/director misconduct allegations; sudden resignation; death or incapacity of a key leader; boardroom dispute; requisition of an EGM; family or shareholder fight; leaked board papers.

First 60 minutes

1. Chair/Lead INED convene the Board; **succession and delegation** plan activated; recusals documented.
2. Disclosure Committee runs materiality screening: resignation of CEO, directors or key management are typically disclosable events V; contested board or shareholder actions require specialist legal advice.
3. Holding statement (T12) focusing on continuity, governance and next steps.
4. Employees told first by the CEO/Chair where possible; the message is "business continues; here is who leads".

Disclosure and regulatory checkpoints

- **Bursa:** director/key management changes and related events; confirm announcement paragraphs and timing V.
- **Companies Act 2016:** director duties, removal, meeting requisition mechanics V.
- **Take-over/change in control** triggers if relevant V.
- **Sensitive personal matters:** health, family matters, allegations — handle with care and legal guidance.

Priority stakeholders: employees; Board; major shareholders; lenders; key customers; regulators; media.

Message pillars: continuity; board stewardship; respect for individuals; process and timelines; stability of operations.

Pitfalls: briefing allied shareholders selectively; leaks from board members; public sparring between directors; the Chair or CEO speaking beyond what the Board has agreed; naming a successor before the Board has actually decided.

Prepare in advance: documented succession plan (including emergency); board protocol on confidentiality and leaks; pre-agreed statements for resignation/death; D&O insurance review; understanding of constitutional provisions for board changes.

S8

Regulatory enforcement, licence action, raids or investigation

Announce the facts, the status and the company's position, and never attack the regulator or declare 'no wrongdoing' early.

Triggers: show-cause letter; notice of investigation; search warrant; inspection findings; licence suspension; public reprimand; fine; Bursa Regulation query; SC investigation.

First 60 minutes

1. Legal and Company Secretary lead; PR supports. One designated liaison for each authority.
2. Immediately obtain and read the letter or notice; calendar every deadline.
3. Legal hold; privilege review; cooperating but protecting rights.
4. Disclosure Committee: assess materiality and the timing of announcement; check if the authority has requested confidentiality (confirm legal basis and effect on disclosure duties) V.
5. Holding statement (T11).

Disclosure and regulatory checkpoints

- **Bursa:** announce material regulatory actions; consider the **content** carefully — facts, status, company's position, potential impact.
- **Sector regulators:** licence conditions often require notification of enforcement events V.
- **Cooperation vs. defence:** counsel balances the two; public messaging remains calm and factual.

Priority stakeholders: regulators; Board; Bursa/market; lenders; customers affected by licence; employees.

Message pillars: cooperation; company's commitment to compliance; summary of measures; how affected customers are protected; next update.

Pitfalls: attacking the regulator; premature declarations of "no wrongdoing"; inconsistent messages to different regulators; failing to meet the response deadline.

Prepare in advance: regulator engagement protocols; inspection and dawn-raid drills; contact list with regulators; compliance-monitoring reports; pre-drafted holding statements.

S9

Financial distress: default, liquidity, rating downgrade, PN17, winding-up petition

Announce defaults, demands and petitions promptly; denying difficulty until the last minute is the main pitfall.

Triggers: covenant breach; missed payment; auditor going-concern language; rating downgrade; supplier payment stops; winding-up demand; statutory demand; PN17/GN3 criteria met.

First 60 minutes

1. CFO and Legal map all debt documents, cross-default provisions and notification obligations.
2. Engage restructuring/financial advisers and lawyers; consider approach to lenders **before** a formal default.
3. Disclosure Committee: assess materiality; check **PN17 criteria** (for example equity at or below 25% of share capital and below RM40 million, as reported in a July 2026 classification) C/V; ACE Market issuers check GN3 V.
4. Stakeholder messaging for suppliers, employees and customers on continuity; **do not** promise what you cannot deliver.
5. Holding statement and Q&A (T7/T12).

Disclosure and regulatory checkpoints

- **Bursa:** announce defaults, demands, petitions and PN17/GN3 triggers promptly and accurately; update as facts change; regularisation plan processes follow classification C.
- **Lender/trustee notifications** per documents.
- **Ratings:** coordinate with CFO.
- **Insolvency law and creditor rights:** specialist counsel.

Priority stakeholders: lenders and trustees; Bursa/market; employees; suppliers and customers; regulators; shareholders.

Message pillars: transparency; clear plan; protecting operations and employees; engagement with creditors; timelines.

Pitfalls: denying difficulty until the last minute; continuing to issue upbeat messages; paying favoured creditors in ways that raise legal issues; failing to communicate with staff.

Prepare in advance: debt map; stress-testing; early-warning indicators; relationship with banks; contingency funding; pre-drafted PN17 communications; legal and financial adviser retainers.

S10

Litigation, class action, major contract loss

Keep public statements consistent with court filings, and never attack the claimant.

Triggers: writ served; shareholder suit; major contract termination; arbitration award; competition or consumer-protection action; adverse judgment.

First 60 minutes

1. Legal assesses claim size and likelihood; insurers notified.
2. Disclosure Committee: assess materiality (amount, nature, effect on operations and finances); announce if material V *(confirm Listing Requirements paragraphs on material litigation)*.
3. Align public statements with litigation strategy; avoid admissions.
4. Holding statement (T11) stating the company's position and that it will vigorously defend or resolve through appropriate channels.

Disclosure and regulatory checkpoints: Bursa announcement and ongoing updates for material developments; reflect contingent liabilities and provisions in financial statements.

Priority stakeholders: Bursa/market; customers; employees; insurers; lenders.

Message pillars: factual summary; company's position; assurance on operations; commitment to update.

Pitfalls: public attacks on the claimant; statements that undermine legal position; inconsistency between public disclosure and court filings.

Prepare in advance: litigation-communications protocol; Legal–Comms joint review; contract termination playbooks.

S11

Natural disaster, pandemic, geopolitical or supply-chain disruption

Safety and continuity first, and account for East Malaysia, remote sites and migrant workers' welfare.

Triggers: floods, fire, landslide, haze; pandemic or public-health order; border or port closures; sanctions or tariffs; key supplier failure; war or unrest affecting suppliers/markets.

First 60 minutes

1. Safety first; account for staff; shelter and evacuate; BCP activated.
2. Facility/asset damage assessments; supply-chain status.
3. Customer and supplier communications on continuity; internal updates at fixed times.
4. Disclosure Committee: assess whether the event, individually or cumulatively, is material to results, operations or going concern.

Disclosure and regulatory checkpoints: Bursa announcements on material business interruption and updates; insurance notifications; authority requirements (for example public-health directives) V.

Priority stakeholders: employees and families; customers; suppliers; authorities; investors; communities.

Message pillars: safety; continuity; practical help; transparency about impact and recovery timeline.

Pitfalls: minimising the impact; marketing tone-deaf messages; failing to account for staff in East Malaysia or remote sites; neglecting migrant workers' accommodation and welfare.

Prepare in advance: BCP and DR plans tested; alternative sites; staff-accounting system; supply-chain visibility; weather/flood watch for exposed sites; pre-approved relief-effort messaging.

S12

Social-media storm, 3R-sensitive content, boycott, ESG/ forced-labour allegations

Apologise without "if anyone was offended", do not blame an intern or an agency, and respond fast.

Triggers: viral video or post; offensive advertisement; remarks by staff, endorsers or executives; religious/cultural offence; discrimination claim; NGO or foreign-media report on labour or environmental practices; organised boycott; foreign import restrictions linked to labour allegations.

First 60 minutes

1. **Treat any 3R-adjacent matter as Level 3** (Section 7). Senior leadership engaged at once.
2. **Take down** the offending content (preserving a record for Legal) and stop related campaigns.
3. Facts: who made it, when, who approved it, what was meant. Do not guess.
4. Prepare a **sincere, specific apology** (T13) where the company is at fault: acknowledge the offence, state what is wrong, what has been done, and what will change. In BM and English together.
5. Legal assesses possible police reports or regulatory actions (for example under the Communications and Multimedia Act or the Sedition Act) [V]. Public members may lodge police reports; MCMC or PDRM may open enquiries.
6. Where relevant, engage community or religious leaders respectfully — and only where doing so is appropriate and not performative.

Disclosure and regulatory checkpoints

- **Bursa:** assess materiality where the matter threatens sales, licences, export markets or contracts; ESG/forced-labour allegations that lead to import restrictions or customer terminations can be material [V].
- **Online Safety Act:** report fake or abusive accounts through platform mechanisms [C]; do not weaponise takedowns.
- **Employment:** investigate and act on staff conduct through fair process.

Priority stakeholders: the offended community; customers; employees; regulators; export customers; investors (for ESG).

Message pillars: "We are sorry. This is not who we are. Here is what we have done. Here is what will change. Here is how we will be held to account."

Pitfalls: "if anyone was offended" apologies; blaming an intern or agency publicly; deleting evidence; slow response; mixing the apology with a product promotion; using AI-generated translations without human review.

Prepare in advance: review process for campaigns (cultural/religious/regional sensitivity review); influencer and endorser contracts with conduct clauses; a standing panel of cultural and religious advisers where appropriate; social media policy; escalation hotline; ESG supply-chain due diligence and grievance mechanisms.

S13

Misinformation, deepfake, impersonation, fake announcement

Verify before amplifying a fake, then correct on official channels and in retail-investor channels.

Triggers: fake "Bursa announcement" or "press release"; doctored video/audio of the CEO or Chair; cloned social accounts offering "investment" or "giveaways"; fake recruitment or customer-service numbers; coordinated rumour campaigns.

First 60 minutes

1. Verify authenticity; Comms and CISO analyse the material; preserve evidence.
2. Public clarification on **official channels**: "This is not from us. Official announcements are made only via Bursa LINK and [website]." Link to the correct source.
3. Report to platforms, MCMC and PDRM as advised; Legal considers takedown and injunctive routes V.
4. Warn customers/shareholders about scams; share the verified hotline.
5. Disclosure Committee: if market-sensitive (for example fake results or fake deal news), consider a **clarification announcement** to Bursa and discuss with Bursa V.

Priority stakeholders: investors and customers vulnerable to scams; employees; regulators; media.

Message pillars: clear, calm, directive: "Here is what is genuine. Here is what to ignore. Here is where to report."

Pitfalls: amplifying the fake by over-sharing it; slow clarification; relying on one platform; forgetting retail-investor channels.

Prepare in advance: verified-channel statement on website and social accounts; domain and handle monitoring; relationships with platform trust-and-safety teams; "How to verify our announcements" page; deepfake response protocol; spokesperson voice/likeness authentication guidance for staff.

PART E OF F

E

Templates and exercises

Templates in English and Bahasa Malaysia, and three tabletop exercises.

16 Templates 67

17 Tabletop exercises 80

16

Templates

Twenty templates, in English and for key statements Bahasa Malaysia, filled with verified facts and cleared by Legal and the Company Secretary.

> **Rules for every template:** (1) fill the brackets with *verified* facts only; (2) Legal and Company Secretary review anything that may reach the market; (3) publish English and BM together; (4) record the final wording and release time in the decision log. Mandarin and Tamil versions must be prepared by native-speaker professionals. **BM drafts below should be reviewed by a native speaker and by Legal before use.**

The scribe records decisions and reasons — not commentary. This log is the evidence of your good faith.

T4

Materiality and disclosure assessment

QUESTION	ANSWER	EVIDENCE / WHO ADVISED
What exactly is the information? (one sentence)		
Could it reasonably be expected to affect the price, value or market activity of our securities, or investor decisions?		
Has any leak signal appeared (UMA, rumour, press query, social chatter, unusual volume)?		
Is any exception to immediate disclosure arguably available (Para 9.05 V)? Counsel's view?		
Is the information confidential **right now**? Who knows?		
Quantified impact (financial, operational, customers, licences)? If unquantified, why and when?		
Is a trading halt needed to announce in an orderly way?		
Related obligations: PDPA, NACSA, BNM, DOSH, lenders, trustees, other exchange		
Decision (announce now / halt / hold with controls / not material)		
Review time (no later than 2 hours or on any new fact)		
Approved by (two-key)		

T5

T6

Do-not-trade and confidentiality notice

Subject: STRICTLY CONFIDENTIAL — Restriction on dealing in [Company] securities

> You are receiving this notice because you have, or may have, knowledge of non-public information concerning [Company] [code name: ____].
>
> 1. Do **not** buy, sell or otherwise deal — directly or indirectly, including through family members, nominees or connected persons — in securities of [Company] or any related securities until you are told in writing that this restriction has ended.
> 2. Do **not** disclose this information to anyone, including colleagues without a need to know, family and friends. Do **not** advise or encourage anyone else to deal.
> 3. Dealing in securities, or communicating inside information, while in possession of material non-public information may be a criminal offence under the Capital Markets and Services Act 2007 (see s.188) and may breach the Listing Requirements V.
> 4. Do not discuss this matter by personal chat, email or social media. Use only [designated channel].
> 5. Please reply to confirm receipt and that you have complied with this notice.
>
> [Company Secretary] | [date/time]

T7

Holding statement: general

English

> [Company] is aware of [factual description] at [location] on [date/time].
> Our first priority is [the safety and wellbeing of those affected / the security of our systems and data].
> We have activated our crisis management procedures and are working with [relevant authorities].
> We will provide further information as soon as it is verified. The next update will be issued by [time] at [website / Bursa announcement].
> Media enquiries: [name, phone, email].

Bahasa Malaysia

> [Syarikat] mengesahkan bahawa [penerangan ringkas berdasarkan fakta] telah berlaku di [lokasi] pada [tarikh/masa].
> Keutamaan kami ialah [keselamatan dan kebajikan mereka yang terjejas / mengamankan sistem dan data kami].
> Kami telah melaksanakan prosedur pengurusan krisis dan sedang bekerjasama dengan [pihak berkuasa berkaitan].
> Maklumat lanjut akan dikongsi sebaik sahaja disahkan. Kemas kini seterusnya akan dikeluarkan menjelang [masa] di [laman web / pengumuman Bursa].
> Pertanyaan media: [nama, nombor telefon, e-mel].

T8

Holding statement: safety incident

English

> We are deeply saddened to confirm that [an accident / a fire / an explosion] occurred at [site] on [date] at about [time], involving [number] [employees / contractors].
> [We regret to confirm that [number] people lost their lives / [number] people are receiving treatment at [hospital].]
> Our thoughts are with their families, friends and colleagues. We have contacted the families directly and are providing full support.
> The emergency services and [BOMBA / PDRM / DOSH] have been notified and we are cooperating fully with their investigations. Operations at [site] have been suspended.
> We will not release the names of those affected until their next of kin have been informed. The next update will be at [time].

Bahasa Malaysia

> Dengan dukacita, [Syarikat] mengesahkan bahawa [satu kemalangan / satu kebakaran / satu letupan] berlaku di [lokasi] pada [tarikh] sekitar [masa], melibatkan [bilangan] [pekerja / kontraktor]. [Dengan rasa sedih, kami mengesahkan bahawa [bilangan] orang meninggal dunia / [bilangan] orang sedang menerima rawatan di [hospital].]
> Kami menyampaikan takziah kepada keluarga, rakan dan rakan sekerja mereka. Keluarga terlibat telah dihubungi secara terus dan kami akan memberi sokongan sepenuhnya.
> Pihak berkuasa kecemasan dan [BOMBA / PDRM / JKKP] telah dimaklumkan dan kami memberi kerjasama penuh dalam siasatan mereka. Operasi di [lokasi] telah dihentikan buat sementara waktu.
> Nama mangsa tidak akan didedahkan sehingga waris terdekat dimaklumkan. Kemas kini seterusnya akan dikeluarkan pada [masa].

T9

Holding statement: cyber / data incident

English

> On [date/time], [Company] detected a cyber security incident affecting [some of our systems / specify].
> We immediately isolated the affected systems, engaged independent cyber security experts and notified the relevant authorities.
> [Our services / operations at X are temporarily affected / continue as normal.] Our investigation is under way to determine whether any personal data has been affected. If it has, we will contact the people concerned directly and comply with our legal obligations.
> We urge the public to be cautious of unsolicited messages or calls claiming to be from us, and to rely only on our official channels: [URL]. The next update will be at [time].

Bahasa Malaysia

> Pada [tarikh/masa], [Syarikat] mengesan satu insiden keselamatan siber yang menjejaskan [sebahagian sistem kami / nyatakan].
> Kami telah segera mengasingkan sistem yang terjejas, melibatkan pakar keselamatan siber bebas dan memaklumkan pihak berkuasa yang berkaitan.
> [Perkhidmatan / operasi di X terjejas buat sementara waktu / beroperasi seperti biasa.] Siasatan sedang dijalankan untuk menentukan sama ada sebarang data peribadi terjejas. Jika ya, kami akan menghubungi pihak yang terlibat secara terus dan mematuhi kewajipan undang-undang kami.
> Orang ramai dinasihatkan agar berwaspada terhadap mesej atau panggilan yang tidak dijangka dan mendakwa datang daripada kami, serta hanya merujuk saluran rasmi kami: [URL]. Kemas kini seterusnya akan dikeluarkan pada [masa].

T10

Holding statement: product safety / recall

English

[Company] is recalling [product, batch/lot, dates] after [verified reason].
If you have bought this product, please stop using it and [return it to … for a full refund / contact …].
[Reports received: only if verified.] We have informed [Ministry of Health / relevant regulator] and are working closely with them.
Customer hotline: [number] ([hours]) · [website]. We apologise for the concern and inconvenience.

Bahasa Malaysia

[Syarikat] menarik balik [produk, kumpulan/lot, tarikh] berikutan [sebab yang telah disahkan].
Jika anda telah membeli produk ini, sila hentikan penggunaannya dan [pulangkan kepada … untuk bayaran balik penuh / hubungi …].
[Laporan diterima: hanya jika disahkan.] Kami telah memaklumkan [Kementerian Kesihatan / pihak berkuasa berkaitan] dan sedang bekerjasama rapat dengan mereka.
Talian khidmat pelanggan: [nombor] ([waktu]) · [laman web]. Kami memohon maaf atas kebimbangan dan kesulitan yang dialami.

T11

Holding statement: regulatory, enforcement or investigation

English

[Company] confirms that [it has received a [letter/notice] from / officers of [authority] attended [premises]] on [date] in relation to [description].
We are cooperating fully with [authority]. As the matter is under [investigation / review], we are not able to comment on its substance at this stage.
The Board has [appointed an independent review by … / formed a committee to oversee the Company's response].
[Business operations continue as normal / The following operational effects apply: …]. We will make further announcements as appropriate in accordance with the Listing Requirements.

Bahasa Malaysia

[Syarikat] mengesahkan bahawa [ia telah menerima [surat/notis] daripada / pegawai [pihak berkuasa] telah hadir di [premis]] pada [tarikh] berhubung [penerangan].
Kami memberikan kerjasama sepenuhnya kepada [pihak berkuasa]. Memandangkan perkara ini sedang [disiasat / dikaji semula], kami tidak dapat mengulas mengenai intipatinya buat masa ini.
Lembaga Pengarah telah [melantik semakan bebas oleh … / menubuhkan jawatankuasa untuk menyelia tindak balas Syarikat].
[Operasi perniagaan diteruskan seperti biasa / Kesan operasi berikut berlaku: …]. Kami akan membuat pengumuman lanjut sebagaimana yang sewajarnya mengikut Keperluan Penyenaraian.
V *(confirm BM term)*

T12

Holding statement: leadership change or allegation

English

The Board of [Company] announces that [name, title] has [resigned / been placed on leave / ceased to hold office] with effect from [date]. [Name] will be succeeded on an interim basis by [name].
The Board has [initiated an independent review of …] following [allegations / concerns raised]. [Name] is entitled to the presumption of innocence. / The Company will not comment further on personal matters.
Day-to-day operations are unaffected, and the leadership team remains focused on [customers / employees]. We will update stakeholders as appropriate.

Bahasa Malaysia

Lembaga Pengarah [Syarikat] mengumumkan bahawa [nama, jawatan] telah [meletakkan jawatan / diberi cuti / tidak lagi memegang jawatan] berkuat kuasa [tarikh]. [Nama] akan digantikan secara sementara oleh [nama].
Lembaga Pengarah telah [memulakan semakan bebas mengenai …] berikutan [dakwaan / kebimbangan yang dibangkitkan]. [Nama] berhak kepada anggapan tidak bersalah. / Syarikat tidak akan mengulas lanjut mengenai hal peribadi.
Operasi harian tidak terjejas dan pasukan pimpinan terus memberi tumpuan kepada [pelanggan / pekerja]. Kami akan memaklumkan pihak berkepentingan dari semasa ke semasa.

T13

Apology statement (conduct or 3R-sensitive lapse)

English

We sincerely apologise for [the content / the remarks / the advertisement] published on [date] by [Company / one of our representatives], which offended [community / religious group / the public]. This was wrong. It does not reflect our values or the respect we have for all Malaysians. [Specific acknowledgement of what was wrong.]
We have removed the content and begun an internal investigation. We will take appropriate action and review our approval processes so that this does not happen again.
[We will meet [representatives] to listen and to make amends.] We will update on [what] by [date].

Bahasa Malaysia

Kami memohon maaf yang tulus atas [kandungan / kenyataan / iklan] yang disiarkan pada [tarikh] oleh [Syarikat / wakil kami], yang telah menyinggung perasaan [masyarakat / kumpulan agama / orang ramai].
Perkara ini adalah salah. Ia tidak mencerminkan nilai kami atau rasa hormat kami terhadap semua rakyat Malaysia. [Pengakuan khusus tentang apa yang salah.]
Kami telah mengeluarkan kandungan tersebut dan memulakan siasatan dalaman. Kami akan mengambil tindakan sewajarnya dan menyemak semula proses kelulusan kami supaya perkara ini tidak berulang.
[Kami akan bertemu [wakil] untuk mendengar dan memperbaiki keadaan.] Kami akan memaklumkan perkembangan mengenai [perkara] menjelang [tarikh].

> ⚠ **Avoid:** "if anyone was offended", "taken out of context", blaming individuals publicly, or releasing the apology in one language only.

T14

Bursa announcement templates

> ⚠ **Important.** These are *illustrative narrative structures*. Bursa LINK uses structured announcement types and fields; your Company Secretary decides the correct type and any mandatory content. Paragraph references below are [V] — confirm before use.

T14A — Initial announcement of a material event

[COMPANY NAME] ("the Company" or "[Short name]")
[SUBJECT — specific and plain, e.g. "FIRE INCIDENT AT [SITE]" /
"CYBER SECURITY INCIDENT" / "RECEIPT OF NOTICE FROM [AUTHORITY]"]

1. INTRODUCTION
The Board of Directors of [Company] wishes to announce that [core fact in one or two sentences].

2. DETAILS
[Date, time and place; nature of the event; how it was discovered.]

3. IMPACT
[People; operations; customers; assets; data.]
[Financial impact: quantified — or "The Company is assessing the financial impact and will make a further announcement when it is able to do so."]

4. ACTIONS TAKEN
[Containment; authorities notified; investigations commissioned; support provided.]

5. NEXT STEPS
[What will be announced next, and approximate timing.]

This announcement is made pursuant to Paragraph 9.03 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad. [V]

This announcement is dated [date].

T14B — Update announcement

[COMPANY NAME]
[SUBJECT — UPDATE: ...]

Further to the Company's announcement dated [date] in relation to [subject] (the "Previous Announcement"), the Board of Directors wishes to provide the following update:

1. DEVELOPMENTS SINCE THE PREVIOUS ANNOUNCEMENT
2. CHANGES TO THE IMPACT ASSESSMENT
3. ACTIONS TAKEN AND PLANNED
4. NEXT STEPS

This announcement is dated [date].

T14C — Reply to a UMA / Exchange query

Do not copy blindly — the reply must answer the actual questions asked, after real enquiry (Section 9.5).

[COMPANY NAME]
REPLY TO BURSA MALAYSIA SECURITIES BERHAD'S QUERY ON UNUSUAL MARKET ACTIVITY

The Board of Directors of [Company] refers to the query dated [date] from Bursa Malaysia Securities Berhad ("Bursa Securities") on the unusual market activity in the Company's securities on [date(s)] (the "Query").

The Board has made due enquiry of [all Directors; key senior management; principal subsidiaries; (major shareholders)] [adapt to what was actually done] and sets out below its response to the Query:

[Quote each question; answer each directly.]

[EITHER] The Board confirms that, save as disclosed in this announcement, it is not aware of any information, development or matter that has not been announced and that may account for the unusual market activity.
[OR] The Board wishes to disclose the following: [...]

The Board [confirms that the Company has complied with the Listing Requirements, including Paragraph 9.03] [only if true after enquiry]. V

This announcement is dated [date].

T14D — Clarification of a news report

[COMPANY NAME]
CLARIFICATION ON NEWS ARTICLE TITLED "[TITLE]" PUBLISHED IN [PUBLICATION] ON [DATE]

The Board of Directors of [Company] refers to the article titled "[Title]" published in [publication] on [date] (the "Article").

The Board wishes to clarify the following:
1. [Statement in the Article] — [Facts].
2. [Statement in the Article] — [Facts; if true, confirm.]
3. [...]

The Company will make further announcements as appropriate.

T14E — Trading-halt request checklist

- ☐ Reason: material information cannot be released accurately and in an orderly way now
- ☐ Bursa relationship contact telephoned (time: ____)
- ☐ Proposed halt period: from ____ to ____ (Bursa decides)
- ☐ Draft announcement ready; ETA: ____
- ☐ Request filed under Practice Note 2 by authorised signatory (time: ____) C/V
- ☐ Board Chair informed · [ ] Insider log current · [ ] Do-not-trade sent
- ☐ One-line public message ready: "The Company has requested a trading suspension pending an announcement."
- ☐ IR and spokesperson briefed; media line agreed
- ☐ Post-halt plan: announce → press release → staff note → analyst call

T15

Employee notice and manager talking points

Staff notice (English)

Subject: [Incident] — what you need to know
Dear colleagues,
Today at [time], we [announced to Bursa Malaysia / confirmed publicly] that [fact].
What we know: [verified facts]. **What we do not yet know:** [open questions].
What we are doing: [actions].
What we need from you:

1. Look after yourself and each other. Support is available at [EAP / HR contact].
2. Refer all media and external enquiries to [Comms contact]. Please do not comment, post or forward.
3. Do not trade in [Company] securities until told otherwise.
4. If you have information that may help, contact [Legal / hotline] — confidentially.
   Next update to staff: [time].
   — [CEO name]

Notis kepada kakitangan (Bahasa Malaysia)

> **Perkara: [Insiden] — apa yang anda perlu tahu**
> Rakan-rakan sekerja yang dihormati,
> Pada [masa] hari ini, kami [mengumumkan kepada Bursa Malaysia / mengesahkan secara terbuka] bahawa [fakta].
> **Apa yang kami tahu:** [fakta yang disahkan]. **Apa yang belum diketahui:** [soalan yang masih terbuka].
> **Apa yang sedang kami lakukan:** [tindakan].
> **Apa yang kami perlukan daripada anda:**
>
> 1. Jaga diri dan saling membantu. Sokongan boleh diperoleh daripada [EAP / HR].
> 2. Rujuk semua pertanyaan media dan pihak luar kepada [Komunikasi]. Mohon jangan mengulas, memuat naik atau memanjangkan mesej.
> 3. Jangan berdagang dalam sekuriti [Syarikat] sehingga dimaklumkan.
> 4. Jika anda mempunyai maklumat yang boleh membantu, hubungi [Perundangan / talian khas] secara sulit.
>
> **Kemas kini seterusnya kepada kakitangan:** [masa].
> — [Nama CEO]

Manager talking-points card (5 bullets)

1. Here is what happened (verified facts only).
2. Here is what the company is doing, and what we are doing in our team.
3. Here is what you can say if asked: "Please contact [Comms]."
4. Please do not post, forward or speculate; do not trade.
5. Here is how to raise concerns, and when you will hear next.

T16

Board, lender and customer notifications

Board notification (phone / secure message)

> "[Chair], this is [name]. At [time] we became aware of [fact]. We have set the level at [level]. Actions taken: [list]. Decisions needed from the Board: [list]. Next update at [time]. Please do not discuss outside the Board or trade in the Company's securities."

Lender / trustee notification (outline)

1. Reference to the facility/trust deed and the provision relied on.
2. Facts of the event (as announced to Bursa, where public).
3. Preliminary assessment of financial effect and covenant position.
4. Actions the Company is taking.
5. Any waiver or standstill requests.
6. Contact point and proposed call time.

Customer notice (outline)

1. What happened, in one line. 2. What it means for you. 3. What we are doing. 4. What you should do. 5. How to reach us. 6. Apology if appropriate.

T17

After-action review

SECTION	PROMPTS
Summary	What happened; dates; level; duration
Timeline	Detection → CMT → first disclosure → peak → close; compare to targets
What worked	Decisions, tools, people
What failed	Delays, errors, gaps (no blame)
Disclosure review	Was the materiality call right? Was the Bursa announcement timely, accurate, complete? Any UMA, leak or trading issues? Insider-log completeness
Stakeholder review	Who was missed? Which language or channel failed? East Malaysia coverage?
Regulatory review	Clocks met? Regulator feedback?
Root cause(s)	Technical, process, culture, governance
Actions	Specific, owner, due date, how we will verify completion
Playbook changes	Section, edit, owner, date
Board takeaway	Three things the Board should know

T18

Analyst / investor call script

Opening (read exactly):

> "Thank you for joining. This call concerns [event]. We will refer only to information already announced to Bursa Malaysia on [date/time] and available on our website. We will not provide any new material information on this call. Some statements may be forward-looking and are subject to risks and uncertainties; please refer to our announcements."

Content: restate the announcement; actions taken; next steps and timeline.

Q&A rules: answer from public information; if a question requires new information, say "That is not something we can address on this call. If it becomes material, we will announce it through Bursa."

Close: repeat next-update commitment; publish a summary on the website.

T19

Media query log and press-conference run-sheet

Media query log

#	TIME RECEIVED	OUTLET / JOURNALIST / CONTACT	LANGUAGE	QUESTION	DEADLINE	OWNER	RESPONSE (SUMMARY)	TIME SENT	OUTCOME / FOLLOW-UP

Press-conference run-sheet

T-MINUS	ACTION	OWNER
T-120 min	Bursa announcement released; statement and Q&A final	CoSec / Comms
T-90	Spokesperson briefing; mock questions	Comms
T-60	Venue, signage (no logos that look celebratory), language support, security, livestream	Events
T-30	Press kit (statement, fact sheet, timeline, contacts) ready; East Malaysia and non-English media invited	Comms
T-10	Final fact check; Legal sign-off on opening statement	Legal
T-0	Statement 3–5 min; Q&A 20–30 min with moderator; closing: next update time	Spokesperson
T+15	Debrief; log inaccuracies; correct immediately	Comms
T+60	Post statement + recording on website; update CMT	Comms

T20

Social media and WhatsApp message set

USE	DRAFT (ADAPT; EN + BM)
Pinned post	"We are aware of [incident]. Our priority is [people]. Facts and updates: [link]. Next update: [time]." / "Kami sedar mengenai [insiden]. Keutamaan kami ialah [orang]. Fakta dan kemas kini: [pautan]. Kemas kini seterusnya: [masa]."
Reply macro	"Thank you for your concern. Our latest verified information is here: [link]. If you need help, contact [hotline]."
Scam warning	"Beware of fake messages claiming to be from [Company]. We only announce via Bursa Malaysia and [official URL/handle]. Report suspicious messages to [contact]." / "Berhati-hati dengan mesej palsu yang mendakwa datang daripada [Syarikat]. Kami hanya membuat pengumuman melalui Bursa Malaysia dan [URL/akaun rasmi]. WhatsApp broadcast to staff	"[Company] update: [fact]. Please do not forward unofficial messages. Official updates: [link]. Questions: [contact]."
WhatsApp broadcast for retail shareholders (post-Bursa)	"[Company] has announced to Bursa Malaysia that [fact]. Read the announcement here: [link]. Summary: [2 lines]. Next update: [time]."

17

Tabletop exercises

Three tabletop exercises rehearse a results-week ransomware attack, a short-seller report with a UMA query, and a fatality with a viral 3R-sensitive video.

17.1

Format

- **Duration:** 2–3 hours for a tabletop; a full-day simulation once a year including the Board.
- **Participants:** Core Five, CMT, Board Chair or ARC Chair, IR, regional heads; observers from outside the CMT.
- **Rules:** play in real roles; use real contact lists and templates; time-box decisions; the facilitator can pause the clock for learning.
- **Evaluation:** score against the criteria in 17.5 and capture actions in the After-action review (T17).
- **Interactive companion:** `docs/crisis-simulator/index.html` (First Sixty) runs three fully branching scenarios based on these exercises, with live regulatory clocks, scoring and a facilitated mode for groups, plus a short academy and the toolkit. It is fictional and carries the same verification limits as this playbook.

17.2

Exercise TX1 — "Friday, 6 pm: ransomware on results week"

Context: quarterly results are due to be announced on Tuesday (within the two-month deadline). At 6 pm Friday ahead of a long weekend, the finance and ERP systems go down; a ransom note demands payment in 48 hours; a leaked sample contains customer personal data.

TIME	INJECT	DISCUSSION
T+0	IT reports ransom note	Who is called, in what order? Out-of-band channel?
T+30	CFO: "We can't close the books"	Materiality? Reporting deadline implications?
T+60	Journalist emails with a screenshot of the ransom note	Leak = end of confidentiality? Halt vs. announce?
T+120	Sample customer data on a leak site	PDPA clock; NACSA applicability; customer messaging
T+360	Board member asks about paying the ransom	Who decides? What advice is needed?
T+24h	Staff WhatsApp rumour about job losses	Internal comms; leak discipline
T+48h	Bursa UMA query as shares fall on Monday	UMA reply protocol

Success looks like: materiality decision logged within 60 minutes; PDPA and Bursa clocks started within 90 minutes; first statement released in EN + BM within 4 hours; ransom decision by the Board; no inconsistencies between Bursa, press and customer messages.

17.3

Exercise TX2 — "Pre-open: short-seller report and a UMA query"

Context: At 7:30 am a short report alleges revenue inflation. By 9:15 am the stock is down sharply and Bursa issues a UMA query; analysts are calling; WhatsApp and Telegram groups carry screenshots.

TIME	INJECT	DISCUSSION
T+0	Report published	Who fact-checks which allegation?
T+30	Trading volume spike; analyst calls	Quiet period; IR script
T+60	Bursa UMA query received	Enquiry steps; board endorsement
T+120	Journalist asks for CEO interview	Bursa-first; approach
T+240	Auditor calls: "Are you seeing issues?"	ARC Chair, auditors' role
T+24h	Report author issues a follow-up	Update strategy

Success looks like: per-allegation fact-check; UMA reply within the deadline with documented enquiry; consistent public position; no selective briefing; trading restrictions in place; Board decision on independent review.

17.4

Exercise TX3 — "Balik kampung weekend: fatality, viral video, and a 3R flashpoint"

Context: On the first day of a long festive weekend, a worker dies at a remote Sabah site. A video, taken by a bystander, spreads with a caption making a religious/racial claim about the victim and the company. Families are in another country; the local press is calling; the CEO is overseas.

TIME	INJECT	DISCUSSION
T+0	Accident reported	HSE and authority notifications; next-of-kin protocol
T+45	Video goes viral	Level; 3R-sensitive; who speaks
T+90	Local politician demands a public statement	Government relations; consistency
T+120	Victim's family in another country has not been told	Embassy, translation, sensitivity
T+180	Bursa announcement needed?	Materiality and halt issues
T+24h	Staff WhatsApp groups circulate rumours	Internal comms; leak discipline
T+48h	Police report lodged; MCMC enquiry	Legal; cooperation; message

Success looks like: family told before naming; DOSH notified; EN + BM statement within 2 hours; East Malaysia spokesperson active; no blame; no insensitive marketing; documented decision on Bursa disclosure.

17.5

Scoring rubric (each 0–3; total / 30)

1. Time to activate CMT · 2. Quality of first statement · 3. Materiality and disclosure decision · 4. Regulatory clocks · 5. Insider controls · 6. One-voice consistency · 7. Language and regional coverage · 8. Stakeholder sequencing · 9. Board involvement · 10. Decision log quality.

PART F OF F

F

Prepare, recover, improve

Preparedness, recovery and the after-action review.

18 Preparedness programme 83

19 Recovery and after-action review 86

18

Preparedness programme

Readiness is built before the crisis: governance, authorised submitters, named alternates, a risk register and a yearly Board report.

18.1

Build list

Governance

- ☐ Board-approved corporate disclosure policy and Disclosure Committee charter
- ☐ Delegation-of-authority matrix for announcements, halts and UMA replies
- ☐ Two or more authorised Bursa LINK submitters with tested credentials
- ☐ Named alternates for every CMT role; compromised-leader protocol agreed
- ☐ Crisis risk register: top 10 scenarios by likelihood × impact, linked to ERM and the S1–S13 playbooks
- ☐ Board and ARC receive an annual crisis-readiness report

Assets

- ☐ Pre-approved holding statements (T7–T13) in EN and BM; Mandarin/Tamil by native speakers
- ☐ Executive biographies and images; company fact sheet; organisation chart; list of subsidiaries and sites
- ☐ Media list (national, regional, language) with relationship owners
- ☐ Stakeholder database with mobile numbers and preferred languages
- ☐ Dark site / crisis page template (hosted independently of main site)
- ☐ Verified-channels page ("How to verify our announcements")

People

- ☐ Spokespersons trained and certified (national, technical, language, regional)
- ☐ CMT trained on this playbook; new joiners briefed within 30 days
- ☐ Next-of-kin notification training for HR/site leaders
- ☐ Social media policy and employee guidelines issued

Partners

- ☐ Retainers: Malaysian law firm; forensic accountants; cyber incident-response firm; PR/crisis agency; IR adviser; translators; call-centre vendor
- ☐ Insurance reviewed: D&O, cyber, product recall, crisis-response, business interruption V
- ☐ Contacts with regulators and authorities (Appendix A) and tested pathway

Technology

- ☐ Media and social monitoring in EN, BM, Chinese, Tamil
- ☐ Out-of-band communications tested twice a year
- ☐ Secure document repository for crisis files with access controls and retention

18.2 The dark site

A ready-to-activate microsite with: statement area; timeline; FAQs; safety instructions; contact details; downloadable press kit; link to Bursa announcements; scam-warning banner. Pre-approve the structure; list who can press "go" (Head of Comms or deputy).

18.3 War-room kit

Printed copies of this playbook · Clock board (blank + pre-filled with your contractual and regulatory deadlines) · Contact sheets (CMT, Board, regulators, advisers, media, major investors) · Whiteboard and markers · Phone bridge details · Power banks and charging · Spare laptops with secure access · Printed organisation chart · Latest annual report and Bursa announcements · Copies of key contracts, facility agreements and trust deeds (or access instructions) · Templates T1–T20.

18.4 Training and testing cadence

ACTIVITY	FREQUENCY
Contact-tree test (call-through)	Quarterly
Out-of-band channel test	Twice a year
Tabletop (one of TX1–TX3 or new)	Quarterly
Full simulation including the Board	Annually
Media training for spokespersons	Twice a year
Next-of-kin notification drill (if relevant)	Annually
UMA reply drill (Company Secretary, Legal, IR)	Annually
Playbook review	Annually and after every Level 3–4 activation or relevant rule change

18.5 Readiness KPIs

KPI	TARGET (SET YOUR OWN)
Core Five reached	≤ 15 minutes
CMT convened	≤ 60 minutes
Materiality decision logged	≤ 60 minutes from first credible indication
First holding statement (EN + BM)	≤ [2] hours from decision to communicate
Regulatory clocks assigned	100% within 90 minutes
Contact data accuracy	≥ [95]% on quarterly test
Spokespersons in-date media training	100%
Actions from After-action reviews closed on time	≥ [90]%

18.6 Customisation checklist before adoption

1. Fill in all [bracketed] fields (roles, alternates, numbers, thresholds).
2. Calibrate severity thresholds (Section 7.2) and have the Board approve.

3. Insert your Corporate Disclosure Policy references.
4. Map your NCII, sector-regulator and licence-specific obligations (Section 5.4, Appendix A).
5. Complete the legal review in Appendix D.
6. Translate and native-review the BM, Mandarin and Tamil statements.
7. Build or commission the dark site and monitoring set-up.
8. Run TX1 within 90 days of adoption.

19

Recovery and after-action review

Leave crisis mode on stated exit criteria, then rebuild trust over 30, 60 and 90 days.

19.1

Exit criteria from crisis mode

Move from crisis to recovery when: (a) people are safe and supported; (b) the situation is contained or stable; (c) required regulatory notifications are done and follow-up schedules agreed; (d) the market has the facts it needs (no pending material announcement); (e) media volume and sentiment have stabilised; (f) the Board agrees. Downgrade level step by step, keeping the Core Five on watch for a defined period.

19.2

The 30-60-90 rebuild plan

WINDOW	FOCUS	EXAMPLES
0–30 days	Fix and show	Root cause; interim controls; compensation/remediation under way; independent review commissioned; Board oversight; regular updates
31–60 days	Prove	Publish findings in appropriate form; implement priority fixes; stakeholder meetings (lenders, major investors, regulators, community); employee engagement
61–90 days	Embed	Governance and policy changes; training; metrics; independent verification; plan for annual report and sustainability disclosures

Maintain a **say-do ledger**: every public commitment, owner, due date, status. Review monthly at CMT and quarterly at the Board. Closing commitments on time is the strongest trust signal you control.

EXHIBIT 5

Recovery runs in three steps: fix and show, prove, then embed

The 30-60-90 rebuild plan.

Source: Playbook Section 19.2.

19.3

Reputation dashboard (weekly in recovery)

DIMENSION	INDICATORS (SET BASELINES BEFORE A CRISIS)
Market	Share price vs. FBM KLCI and peers; volume; analyst rating changes; bid–offer behaviour
Media	Volume, tone, spokespersons quoted, error rate, East Malaysia coverage

DIMENSION	INDICATORS (SET BASELINES BEFORE A CRISIS)
Social	Mentions, sentiment, share of misinformation, 3R flags
Stakeholders	Customer complaints and churn; supplier terms; lender engagement; regulator correspondence
People	Employee pulse score; attrition; whistleblowing volume
Governance	Open Board actions; say-do ledger completion

Report outcomes, not output: what changed in understanding, trust and behaviour — not how many statements were issued.

19.4 Disclosure and governance follow-through

- Review whether **annual-report disclosures** (risk management and internal control, corporate governance, sustainability) reflect the crisis and the remedial steps.
- Confirm that continuing disclosure obligations (follow-up announcements, quarterly report commentary, contingent liabilities) are covered.
- Review **board effectiveness** and **committee remits** (ARC, risk committee) in light of the crisis.
- Reassess D&O, cyber and other insurance terms.

19.5 After-action review and playbook update

Within 30 days of de-escalation, run the After-action review (T17) — psychologically safe, facilitated, focused on system fixes. Present to the Board. Update this playbook, assign owners and dates, and schedule a tabletop to test the changes.

C.2

Not verified — treat as prompts for counsel

- Exact wording and sub-paragraphs of Main LR Paras 9.03, 9.04, 9.05 (conditions), 9.08(2) and (3), 9.11 versus 9.16 (which paragraph Bursa currently cites for UMA queries), 9.19(19), 9.22, 9.23 (items 25 to 29 in C.1 are secondary summaries; Bursa's own text was not reachable from the

drafting environment); Chapter 14 closed-period length; Practice Note 2 wording; PN17 criteria in current text (including RM40 million); ACE Market equivalents (including GN3 and Sponsor obligations).

- The investor-decision limb of the "material information" definition.
- BNM RMiT incident-notification window.
- CMSA penalty figures and any additional CMSA provisions on false or misleading disclosure.
- MACC Act s.17A deemed-liability provision; Whistleblower Protection Act 2010 detail; Companies Act 2016 s.213; Evidence Act privilege (including in-house counsel).
- Environmental Quality Act incident-notification requirements for your licences.
- Online Safety Act response windows and penalties.
- Whether any Bursa Issuer Communication Notes or Corporate Disclosure Guide updates since 2011 change the guidance above.
- Sector-specific obligations for your industry.

D

Legal review: questions for counsel before adoption

Fifteen questions for counsel to answer before the playbook is adopted.

1. Confirm the current text and sub-paragraphs of Main/ACE LR Paras 9.03–9.05 and 9.16, and the Corporate Disclosure Guide's treatment of rumours, media and analysts.
2. Confirm Practice Note 2 procedure for trading suspension, typical timings and Bursa's expectations.
3. Confirm the Chapter 14 closed period and director-dealing notification rules, and which company-dealing activities (buy-backs, ESOS, placements) must pause while inside information exists.
4. Confirm the board-endorsement and signature requirements for UMA replies and general announcements.
5. Confirm the PN17/GN3 criteria in the current text and the timelines after classification.
6. Confirm PDPA breach thresholds, forms, and the interplay with customer communications.
7. Confirm whether we are, or may be designated, an NCII entity; confirm CSA 2024 clock start points.
8. Confirm sector-regulator notification triggers (for example BNM RMiT) and clocks.
9. Advise on privilege for investigations, communications advisers and in-house counsel.
10. Advise on defamation, CMA s.233 and Sedition Act risks in crisis statements and on safe language for allegations and investigations.
11. Advise on s.17A MACC Act adequate-procedures evidence and the dawn-raid protocol.
12. Advise on ransom, sanctions and law-enforcement notification policy.
13. Advise on cross-listing, bond/sukuk trust deed, and facility covenants for notification timing.
14. Advise on D&O and officers' exposure for disclosure failures, and on insurance notification requirements.
15. Review Bahasa Malaysia and other-language templates for legal and linguistic accuracy.

Acknowledge every query in 15 to 30 minutes with a time for the answer. Give the same facts in every language. Nothing market-sensitive goes to a journalist before Bursa.

W5 Situation report

INCIDENT _____ DATE AND TIME _____

LEVEL L1 ☐ L2 ☐ L3 ☐ L4 ☐ PREPARED BY _____

SITREP number, time, author	
Crisis level (and change since last report)	
Verified facts (source and time confirmed)	
Unverified or unknown	
People: affected, injured, missing, supported	
Operations, customers, systems	
Market: price, volume, UMA or halt status, investor contact	
Disclosure: announcements made, planned, pending	
Regulatory clocks: status of each	
Media and social: top stories, errors, sentiment, 3R flags	
Stakeholder actions completed or due	
Decisions needed from the Crisis Lead or Board	
Next SITREP	

Strictly confidential once completed

W6 Materiality and disclosure assessment

INCIDENT _____ DATE AND TIME _____

LEVEL L1 ☐ L2 ☐ L3 ☐ L4 ☐ PREPARED BY _____

What exactly is the information? (one sentence)	
Could it reasonably be expected to affect the price, value or market activity of our securities, or an investor's decision?	
Has any leak signal appeared? (UMA, rumour, press query, social chatter, unusual volume)	
Is an exception to immediate disclosure arguably available? Counsel's view and reference	
Is the information confidential right now? Who knows?	
Quantified impact: financial, operational, customers, licences. If not yet quantified, why and when?	
Related obligations: PDPA, NACSA, BNM, DOSH, lenders, trustees, other exchange	
Decision	Announce now ☐ Request a halt ☐ Hold with controls ☐ Not material, log and monitor ☐
Review time (within 2 hours, or on any new fact)	
Approved by (two keys: Legal or Company Secretary, and CEO or CFO)	Signature 1: _____ Signature 2: _____

Presume disclosure where there is doubt. Document the reasoning even when you decide the information is not material. Reassess every two hours.
